2/15/94

Dear Hal,

With a break in the weather I was able to do a little walking this morning and then take lil shopping and to lunch. The result is that we are both tired and today's mail is heavy. So before reading the interesting enclosures with your 2/12 I respond in haste so you will not waste any time on what I now have no time for, ~~the~~ Korff and anything on Astor's book. I put the Korff file in the files ^{as} and something not worth my now taking time for and ^{as} what is not in any sense promising or dependable. And I'm awkward getting the files and returning them so I do not ~~recall~~ recall enough to make any suggestion, other than getting him to confirm in some reasonable what what he said that you send.

Do not take any time on Sparks for me, either.

My question on ~~D.A.~~ Livingston was, I believe, not was he in Crazy Harry's High Trash 3 but was it at Harry's press conference that he spoke. I had no intention of quoting him. I just wanted to know. And I'll ~~not~~ get the video, thanks,

If I can do the cable bit by phone before our time 6 p.m. I'll be glad to. ^{or} you can use anything already on ~~xxxxx~~ cassette from me.

We were fortunate in the most recent of the constant series of storms going back to before Xmas. I was able to get out the day before the last one, had been scheduled for a blood test the day before, so I phoned the lab, to which I've been going for 18 years, to ask ~~if~~ if the niggardly building management had at last cleared the gutters ^{and walkway} that had been icy just about all this time. The woman who answered the phone said to call back in 2 hours so they could know. Another woman then told me not safe for me, to honk the horn and one of them would come down and draw my blood at the car, at curbstode. 10 degrees, below zero windchill. I said that before I'd do that I'd try the other side of the building, where there is a canopied walkway and probably no ice but if I could not I'd return and honk. I did find that place open and before I could get out of the car one of the women technologists had rushed down, fully loaded with all she needed but without any overcoat, to draw my blood there. She went back into the building with me, we returned to her floor, she drew my blood and then brought me a cup of coffee. Made me feel good! And Saturday a neighbor who has a snow blade on his pickup cleared the lane. So, we were lucky! ^{But} when I had a chance to do a little waling this morning I had to stop earlier than usual. From all those weeks of not being able to do it.

Thanks and our best,

Hal

FREDERICK, MD-21702

Dear Hal =

As I promised you I'm enclosing copies of various articles I believe you'll find of interest. The particular ones I think you'll find are these: (1) "Back Channels" article on Weisberg by Mike Stanke (of Wisconsin); (2) A review of Groden's new book by Doug Horne. Doug is a researcher I met in Dallas at the "ASH" Symposium last November. We keep in regular touch by mail; (3) the Peter Dale Scott report on the Lopez Report; (4) The Anthony Summers article in the British Esquire (on Oswald). Keep in mind that this is the British not the American version; (5) The San Jose Mercury article of 1/29/94 on Kal Korff.

On the Kal Korff article = I don't recall if I wrote you before but I did find in the San Jose Santa Clara telephone Directory the name & phone number of the company Kal Korff works for. Here it is (in case I didn't already give it to you):

CLARIS CORP. ----- #987-7000
CUSTOMER RELATIONS ----- #727-8227
TECHNICAL SUPPORT ----- #727-9054.

Note = A local researcher here in the area told me that

he personally knows the Brad Sparks (mentioned in the article on Korff). Apparently at one time Sparks was a keen JFK assassination buff and also a UFO researcher. If you need to know more I can find out more about Sparks.

I have not yet contacted Kal Korff and am wondering just exactly how to go about this. Perhaps you can suggest how I can do this. Of course I don't buy any of his "Computer research" he claims to have done which outdid Posner.

You had also asked me if I knew of any other place besides Livingstone's "Treason" book where the Robert Livingstone statement appeared (in written or printed form) & the answer is - no. There is another form it appeared in & that is in video when he spoke at the "Ask" Symposium last November, 1993. Of course the video can be ordered through the Symposium but that is the only known form I know of. There isn't any question that he repeated the essentials of what he had to say at the "ASK" Symposium & I can understand your reluctance to quote from Livingstone's book. Perhaps you can obtain Dr. Livingstone's address & phone # from the "ASK" Symposium or through Mary Ferrell.

You had also asked me to give you the publisher & date of Astar's book on Mengele. I will do this but I haven't been to the library lately & I'll provide

-3-

that information after I do visit the library.

One last item - I don't recall if I mentioned this but some time in the Spring of 1994 I'll be doing a 13 one-hour series for a local (S.F.) Cable TV station on the subject ("Assassination Update"). I chose the title & it'll be a monthly series. I'd like to have you as a guest but the problem is that it is a live TV show. Perhaps I can get someone to tape you (John Szerszen comes to mind) & we can use the video on the live portion. Most likely the series will be aired on a week-day night at about 8 p.m. (S.F. time). Of course this is months away & I'd like to have you consider this & let me know what your thoughts are on this.

I hope the enclosures will be of use and if I come across more I'll send you copies. In the meantime I do hope that the latest storm hasn't seriously interfered with your activities.

Best,

Hal
