The world ahead will bring tougher challenges and new tests. And with today's sluggish economy, reductions in military forces, and cutbacks at state colleges, graduates will have to pay their dues a little longer than their predecessors. Nevertheless, Peninsula high school graduates should cherish the moment and celebrate their accomplishment. They've earned their diplomas and they've earned the right to a joyous celebration. Though we urge graduates to enjoy a safe celebration. Too often the combination of automobiles, youthful exuberance and booze at post-graduation parties has ended in tragedy. Non-alcoholic and drug-free parties are a growing trend on the Peninsula. We urge schools to sponsor more events. Congratulations and best wishes to the Class of 1992 for a long and prosperous life.

nobody asked me, but...
by Jerry Fuchs

Nobody came to the press conference!

Jerrold Custer and Floyd Riebe held a press conference the other day and hardly anyone came. Custer and Riebe were eyewitnesses to the crime of the century, the greatest lie of our lifetime, yet their appearance was ignored. The two men contradicted the highest court in the land, the two most important law enforcement agencies in the nation, a team of the most prestigious attorneys (one of whom sits in the United States Senate) and yet the media was hardly present at their press conference.

Considering the import of what they had to say and the timing of their statements, there should have been a mob of reporters there to listen and question them. Television cameras should have been everywhere. Congressmen and senators should have fought for seats. But there were hardly any reporters, no television cameras and no elected officials present to hear what they had to say.

Nobody in the established media wants to hear our government's institutions torn down by two private citizens. No one with the prestige and clout of a Sam Donaldson or a George Will is going to spend any time looking at a few facts certain to expose the lie that John F. Kennedy was killed by a single assassin firing from the book depository building in Dallas. It takes courage and intelligence to go against the grain of history and the powerful forces of the establishment which have bulldozed the theory that one man, Lee Harvey Oswald, a nut who hated the president, assassinated Kennedy by firing two shots which hit him from the rear.

Yet, a week before Custer and Riebe appeared at their press conference, another press conference was called in the same city of New York by two surrogates who were not present at the autopsy of President Kennedy. The scene was crowded with reporters and media persons. The conference was called by Dr. George Lundberg, and Dennis L. Breo. They interviewed two of the three doctors present at the Kennedy autopsy in Bethesda, Md., for an article in the prestigious Journal of the American Medical Association. In that article Drs. Humes and Boswell are quoted as saying that Kennedy was hit by only two bullets, fired from above and behind and that one of them caused the massive head wound that killed him.

The press conference conducted by the writers was carried in length in the nation's newspapers. Television and radio gave the Journal story extensive coverage saying that the Kennedy autopsy doctors affirmed once again that there was no conspiracy to kill the president and that the Oliver Stone movie was wrong.

In that Journal article Dr. James Humes, who performed most of the work at the Kennedy autopsy, was quoted as saying, "Nothing was faked, all that is just nonsense. How could X-rays be doctored and why?"

But Custer and Riebe put the lie to the Journal story because they could not sit back and let history distort the facts. Custer is the man who took X-rays of Kennedy's body at Bethesda Naval Hospital the night of the assassination and he says, "The X-rays are wrong in indicating that a portion of Kennedy's face was destroyed. There was no damage to his face and no part of his skull was missing on the forward part of his head. These are fake X-rays."

Now if it was just Custer who challenged the doctor's statements, the government could issue one of its infamous denunciations proclaiming the man to be a malcontent or just plain nut. But Custer is joined by Floyd Riebe who happened to be one of the photographers taking pictures for the government that evening.

h school class of 1992

The world ahead will bring tougher challenges and new tests. And with today's sluggish economy, reductions in military forces, and cutbacks at state colleges, graduates will have to pay their dues a little longer than their predecessors.

Nevertheless, Peninsula high school graduates should cherish the moment and celebrate their accomplishment.

They've earned their diplomas and they've earned the right to a joyous celebration. Though we urge graduates to enjoy a safe celebration.

es model recreation plan

ter and the Boys and Girls Club of the Peninsula are joining forces to more effectively reach out to children and provide adult-supervised recreation.

Recreation leaders formed the Youth Agency Task Force last month to encourage a joint effort instead of the existing institutional turf wars. The agencies were competing for the same children in some neighborhoods and inadequately serving kids in other areas.

Ironically, the three agencies reflected the same territorial attitudes that they wanted to dispel among children. Instead of breaking down geographic and ethnic barriers, the organizations were providing similar but separate recreation programs that seemed as segregated as the neighborhoods served.

By combining forces, the Youth Agency Task Force can reduce redundancies, increase efficiency, and offer more recreation options for children.

Recreation officials throughout the Peninsula would be wise to take a look at what's going on in Redwood City.

Peninsula News Service

was hardly present at their press conference.

Considering the import of what they had to say and the timing of their statements, there should have been a mob of reporters there to listen and question them. Television cameras should have been everywhere. Congressmen and senators should have fought for seats. But there were hardly any reporters, no television cameras and no elected officials present to hear what they had to say.

Nobody in the established media wants to hear our government's institutions torn down by two private citizens. No one with the prestige and clout of a Sam Donaldson or a George Will is going to spend any time looking at a few facts certain to expose the lie that John F. Kennedy was killed by a single assassin firing from the book depository building in Dallas. It takes courage and intelligence to go against the grain of history and the powerful forces of the establishment which have bulldozed the theory that one man, Lee Harvey Oswald, a nut who hated the president, assassinated Kennedy by firing two shots which hit him from the rear.

Yet, a week before Custer and Riebe appeared at their press conference, another press conference was called in the same city of New York by two surrogates who were not present at the autopsy of President Kennedy. The scene was crowded with reporters and media persons. The conference was called by Dr. George Lundberg, and Dennis L. Breo. They interviewed two of the three doctors present at the Kennedy autopsy in Bethesda, Md., for an article in the prestigious Journal of the American Medical Association. In that article Drs. Humes and Boswell are quoted as saying that Kennedy was hit by only two bullets, fired from above and behind and that one of them caused the massive head wound that killed him.

The press conference conducted by the writers was carried in length in the nation's newspapers. Television and radio gave the Journal story extensive coverage saying that the Kennedy autopsy doctors affirmed once again that there was no conspiracy to kill the president and that the Oliver Stone movie was wrong.

In that Journal article Dr. James Humes, who performed most of the work at the Kennedy autopsy, was quoted as saying, "Nothing was faked, all that is just nonsense. How could X-rays be doctored and why?"

But Custer and Riebe put the lie to the Journal story because they could not sit back and let history distort the facts. Custer is the man who took X-rays of Kennedy's body at Bethesda Naval Hospital the night of the assassination and he says, "The X-rays are wrong in indicating that a portion of Kennedy's face was destroyed. There was no damage to his face and no part of his skull was missing on the forward part of his head. These are fake X-rays."

Now if it was just Custer who challenged the doctor's statements, the government could issue one of its infamous denunciations proclaiming the man to be a malcontent or just plain nut. But Custer is joined by Floyd Riebe who happened to be one of the photographers taking pictures for the government that evening. When he saw the photographs released by the government of Kennedy's body he said, "They are phony and not the photographs we took."

The difference between the two press conferences is that Drs. Humes and Boswell never showed up to answer questions. Yet the media was there in droves. But when two eyewitnesses, Floyd Riebe and Jerrol Custer, called a press conference to dispute the doctors and were there in person, hardly anyone showed and the media blacked out their statements.

When Dr. Humes asks why anyone would distort the facts, I ask why the president's brain was removed and why it is missing from the archives? I ask how those shots could be fired from the rear, when the Zapruder film clearly shows the president being hit from the front and his head going back from that shot and brain matter exploding to the rear of the limo.
