

Dear Hal,

9/11/98

Glad to get your letter of the 7th and the enclosures. Of which I've read only your fetzering. I'd missed one of your quotes of Mantik and I'll be adding to it with documentation. I've documented all ~~if~~ I've said about both of those self-important phonies and if this ever see the light of day they'll slink into the dark, forever. I'm on chapter 19, more than 3000 pages, I as of now think there will be one more, and that is too much for me to copy. When it is retyped there will be ~~a~~ disk and Bill will have a copy for you, I'm sure when he gets his disk.

I know nothing, did not hear about, the TWT special for 11/98. No cable here, either.

I know nothing about the AR&B transcripts. I asked only for the two I have and I've not taken time to read the, much as I wear e about them. First things first and for me, even more with a few accelerations in some medical problems, getting it all on paper is first, to the degree I can now

Your Fetzering is good but I think you took the wrong approach. Clo bber them with their endless ignorance, their stupid opinions and son't wast time defending yourself for what I call them, subject-matter ignoramuses.

Look at thei bibliographies (Fetzer has a substitute for it and see how little he has read on the assassination, and most of that trash. And what he has not read.

At Lancer, my slight connections have been with the woman so I won't offer them this book., not with that self-important fool/idiot Evica their editor. He actually solicited a paper on me as a CIA agent!

I think yo made a mistake to be critical of the Kennedys the way you were. They had survival to think about and theree were two different Kennedys and two different Kennedy administrations. He was wrong from time to time but some of that was created to leave him no choice. Cuba, for xample. I go into that and more in what I think Bill may not yet have, Waketh the Watchman. Big and has two epilogues. I am getting much on paper, more than I'd have thought possible.

Thanks and best,
