10/6/95

Dear Kevin,

At the time I received those complaints I told Jim. One was from Lasse Larsen of near Copenhagen, Denmark, and the other was from Dal McGuirk, 93 Park Road, Epsom, Auckland 1003, New Zealand. I do not believe there was any tipoff intended. Merely negligence. My hope was to generate a bit of care in such matters. If I recall correctly, both told me they also wrote without even acknowledgement, and they wrote about getting nothing for their money.

As I'm sure I told you I do not remember more and cannot use the stairs to get at those records. If I'd remembered more I'd have told you.

The questions you ask about Hardin are much too simple. How did Hardin know/~~he~~ know about Ray?

What interest did Hardin have or serve?

Why would he get in touch with Ray?

And be interested enough to ~~cross~~ cross the continent to see him in person, after Ray apparently did not return his call, but this is not certain. Even more provocative is after they spoke by phone.

Hardin gets to LA and then Ray leaves - for Atlanta, Hardin's turf.

And of all the places for Ray to go after the assassination, he goes to Atlanta. And only then leaves the country.

These say some of what I think. I do think a little more but I don't want that misused by some with whom you have an association.

I tell you in confidence you and you alone, that I think Kepper's book is terrible in ~~no~~ every way. It is not honest, not accurate, not responsible and no help to Ray. And that it deceives and misleads those who read it. I do not want to waste the little time and energy I have in pointless controversies.

I do not remember mentioning AARC's cashing checks and sending nothing in return outside AARC. With which I have close to no contact so it could not have been often. Or to many.

We both hope you can make it up soon. The dogwoods started to color early. Others are just starting to color now.

Best,

Hardy

Dear Harold,

Thanks for your letter of 9/29. I was hoping you could be more helpfull on the Hardin matter and the man in Chicago. Do you have the records or know where they are? I have all that is available on Hardin but nothing on the other man. From one of the Carolinas? Do you have a name or know where anything on him is? And what is your analysis of a Bureau informant being in contact with an escapee ? Any idea what the Chicago business means.?

I'm also interested in what you think of Bill Peppers' book. He claims a lot and I await him producing some of these code named people. The military had M.L.K. and Andy Young in their sights at the moment of the shooting !?

Please tell me the names of any person who has not received what they paid AARC for. You have mentioned this to others without names and the obvious effect is defamatory and does not help us to correct the problem. Please bear in mind that we are struggling to put this place on track and with NO help. The intimation that AARC is ripping someone off is unfair. Both Jim and I have put many thousands of our own money to keep the AARC alive this past year and I, for one, have not heard the words Thank you from anyone. Should you receive any more complaints, please send them to me.

The catalogue of our library will be out this year. I'm also optimistic about getting some Library science majors next semester to organize and catalogue the files. Jim recently bought a top of the line computer. We have an optical scanner and will be able soon to distribute key documents and new releases on discs.

Please give my warm regards to Lil. I'll try to get out your way when the foliage is peaking.

Thanks,

Kevin
