Excernt deal ing with Warristonmission Report:

Mr. President, in light of current concerns regarding the assessination of Presidet Kennedy, and recent showings of the Zapruder time, do you still have kinks the same confidence in the findings of the Warms Commission that you had as a member of that commission?

President Ford: -- I think you have to read very carefully what the Warren Commission said, and I, as a member of the Warren Commission, helped participate in the drafting of the language.
We said that Lee Harvey Oswald was the assassin. The waid that We said that he Harvey Oswald was the assassin. The waid that the commission had found no evidence of a conspiracy, foreign or domestic. Those words were very carefully drafted. And so far I have seen no evidence that would dispute the conclusions to which we came. We were most careful because in 1963 and '64, when we most carefully analyzed all the evidence that was a valiable, there was none of the involvement of anybody, or anybody as a group, in the assassination. It's my understanding that the Bockefeller Commission may, if the facts seem to justify it, take a look at it, at the problem, and I suspect that the House and Senate committees that are currently inestigating the CIA history may do the same. But the Commission was right when CIA history may do the same. But the Commission was right when it made its determination, and it was right, at least to this point, and I want to re-emphasize that as to the evidence that we saw. (end except)
