

5/12/77

Dear George,

My call day before yesterday was to let you know that the House nuts are preparing subpoenas. My source has to be protected so do not let it be known that this comes from me.

These irresponsibles are going to rehash earlier irresponsibilities with the irrelevant, beginning with Maheu.

There was a story on west-coast radio news quoting an eastern, as I recall Maryland shooting expert who said he is one of those used by the Warren Commission. He has a new theory, that the Secret Service killed JFK by accident and this is why the FBI ~~wizhhzzzzzz~~ continues to withhold those scientific tests from me.

I now have records showing that the Warren Commission did know about the Castro speech at the Brazilian Embassy in Havana about 9/9/63

So much for those stories leaked to exculpate the Commission and blame the agencies. Liebeler even asked for the same story Rocca made a big and wrong deal out of in his memo for the Rockefeller Commission.

No papers gave it the Rocca interpretation. Even the AP didn't. The downplay is greater in the stories for pms, which the Commission also asked for and received.

Jim and I have both heard from John Larry Ray recently. There may be a story in what happened to him. Briefly, he is in jail on an 18-year sentence for giving a ride to an alleged bank-robber who was found not guilty. John says the FBI framed him and the alleged robber made a deal with them. I believe John and I think Jim does. In any even, he is guilty of a non-crime and his request for parole was rejected.

astily,
