

Later 6/19

Dear Walter,

I do not visualize the possibility of any commercial interest, but should you hear of any, remember I have quite an extensive files for a book on the current bugging flap. I have files on the people mentioned, including many FBI reports for quite an appendix.

Some pretty farout possibilities now seem not impossible. I've been spending much of today backgrounding, searching files, including of photos, etc.

Anything you see in any papers will be welcome if you have time to send.

In the end it will be necessary to identify source money, undoubtedly known by now to FBI, earlier to Bureau Printing and Engraving.

All sorts of big names are peripherally involved, including Smathers and Rebozo, both meaning Nixon and both connected with crime syndicate.

Protected law violations, like neutrality act, attacks on ships of "friendly" powers, apparently mysterious deaths. Crazy. I have old but relevant files. Trouble is, soldier-of-fortune types not solid sources.

For your information, please note that the denials to date, while seemingly indignant, are too limited. They add up to no more than the Committee to Re-elect the Pres. and the Republican National Committee. Not one of the hundreds of subsidiary and pretendedly independent committees. This was so unprofessional I am confident the top committees had no direct connection.

Last thing I said last night before we retired: "I sure enjoyed that baby." I can't remember the last time I heard her mention any baby. We were impressed!

Haste and best,
