

Dear Mr. Weisberg,

I just finished "Case Open". Thank you for nailing Posner. Obviously his book didn't just happen. It was needed by the powers that be and their servants in the media as something they could point to to deflect the public's attention away from what really happened. It was timed especially for the 30th anniversary. And now Norman Mailer has sold his soul as well. Hope your health allows you to do to him what you did to Posner. Your insight into the media's role is on target. We live our lives entangled in webs of endless deceit and one must really make an effort (as you have done) to find the truth. Unfortunately, too many Americans are too lazy and too brainwashed to escape the entanglements of official lies. And therein lies the decline of our society. I often think there ought to be a protest demonstration every day in every city in this land demanding the case be re-opened, demanding that we get the truth..... It is no coincidence that you can chart the rapid decline of this country to the date, November 22, 1963. But I'm starting to ramble. Enclosed is a check for \$30. Could you send me Whitewash and Frame Up. I'm not sure of their cost-if I've overpaid, keep the change; if underpaid, please bill me the difference. Thank you.

Sincerely,

Chip DeNure
