Dear Harold:

I was not the least bit surprised to learn from your recent letter about the actions of Livingstone. Yes, indeed, he is a monster and much worse.

I have not had any contact or dealings with him in any way for approximately a year. If he attempted to communicate with me, I would not speak to him by phone or respond to any letters.

I doubt that I have any correspondence with him that would be of interest or relevance to you regarding the present situation.

Please let me know what happens.

I am glad to hear that you are in good hands at Hopkins once again. I hope that your condition will now be treated properly and stabilized.

With kind regards.

Sincerely,

Cyril H. Wecht, M.D., J.D.
