Student Movement of Wisconsin

AMERICAN CANCER SOCIETY  
MILWAUKEE DIVISION, INC.

GENERAL ONE-MINUTE  
CRUSADE, 1967

In any disease, early medical-treatment can be helpful in returning you to health. In cancer, early treatment can be the difference between life and death. If you suspect cancer, never wait and see. The Milwaukee Division of the American Cancer Society advises: only your doctor is competent to determine whether you actually do have cancer. If his diagnosis is yes, treatment must begin at once. Unfortunately, tens of thousands of people die of cancer each year because they get to their doctors too late. Be sure you and your family are protected. Your best safeguard is a yearly health check-up for all adults. And you should know cancer's warning signals. . . . Soon an American Cancer Society volunteer - your neighbor - will call on you to give you a list of the warning signals - which you can paste in your medicine cabinet for ready reference. So, guard those you love. Know the warning signals...and help conquer cancer by giving to the Milwaukee Division of the American Cancer Society. Knowing and giving are a way of living.
