 de ques not unaersunfiu why fuines diu not gnone nim then, when he nabi the souy In frunt ui aim, anu felieves it woulu have ceen númal. iie azparently is ur tne opinion tue rresinent's was no autop̉j at als'and nas a very uish upinion of the coapetence of ur. nose, tne then sallas coraner.
ne mainvain. that ne was not tyla uy mumes wint their repurt woula say ana aisputes wr. Clarx's testimony tnat ne hau askeu diarx to, take ais Saturuay fress conference becuuse of this. Ie says tnat on saturuay tnere was merely a prepared statement iswlued. 1 tula nim of tne comlict and its sionificance, uut he mapntained nis account and reculiection to be currect.

He smiled ana $a_{b}$ reed tna.t $\mathrm{S}_{\mathrm{p}}$ ecter's pretense de naa no accuunt of rery's first-day press courerence was iictitious, trat the business of the electronic meuia not naviua their tapes availaul= was nunsense, tata the newspapers naa quoted him at some $1 e n_{5} t n$ and that, in any event, there waficaich at some lensth and that, in any event, there was f veruatim transcript vmy recollection is uy the Secret Service, althougil 1 am not positive it was oy unis asency) ana ne nad oeen shown it. Yet, ne seems to ve without quesiion taat he snoula aave peen In tre miunle of such a cnarave.
lie is without couot that the Predicient's rear, non-ratal wound was in the uack ana not the fusk on iwo vases: he fuunu the measurearnts, which ne quoted varoatim, placed it arout two inches veluw tho top oi the vack, anu he had su veun told of the上etnesua doctoris. He showea us on nimself. I felt where ne nela nis inger and it was adout twu incnes velow tue top line, cunsistent with keilerman's uescriptiong Assuming tae front and rear wound to nave veen caused oy a single vullet, he said that hau the raar wouna veen any iower, it woula nave fit tne lung, theredipre he Delieves it wa: no lower.
apparently nut readizing the contlict peiween his statement ana Humes' notes in Exiliolt 397 , he saia tre iirst call was on the tracn ank the secona on the lung and the olujd nosaw there on sursery. snere is no sucn ffumes nutation.

Decause ne nau to leave - we jornaps uelayea nim past an appointmut - I did
not su into vetail with nim on ceztrain aspects or tae autopsj atiu injuries, as pernaps 1 misnt neve under ovnex circumstances.

Ge voiunteered the opinion that fiancuester hau 'ro nave naa a conaection Witn the nepriedy Iamilf in writino wis ouush vecause ne got a letter sioned oy Hrs. Jacquline ne..nedy asking nim to de inverviewed uy hancuesver. se says tnat eltaous. hanchester never aia interview nin, ne aia quote serry directly, as thourh ne nad.
ne was a very $\operatorname{lon}_{5}$ bime in answexin, the pase, so lon that at uer a while I haú Ir, Hoclelland pased. when he uid not answer, 1 had $u r$. Kose pased. Atiter the Iurther passa, e ol time, witr no $r=s$ junse, I was in a phone joutn making a call when Perry came down. Inis is not unusual, oecause ne cululu nava been with a patient.

He aves not agree taat wr. S..ires was in change of Connally's post-operative care, Ior reasuns navins to ao. With the gractises or the paricland uuctors, yet nis explanation was not comprenensiulu to tie. He agrees anires was, in fact, the doctor who wiu oive inis care, tat is yari of it ne uid oraer arrays. he says he dia not know taat tnese caesu a-rays disclozed metal in the ohest.
un the les̃ wouna, he saia what ne hau oeen tola oi it is tnat it was a vary shallow one. I asked nim in the aescription inaicated it could nave held the vullet captive auring the drive to tho nospital ani all the oner movements of lonally's
 Delief this was unlikely, he also suiu tnere was a queswiun whetner the thetat in the tioia, snown in the s-rajs, actuslly came frog tnis wound. His reasoniag seems to de vased on the lact that the wound was so snallow tne sullet did not hit tne tioia. He also virers no explana.ion lur the presence ur the aetal, no previou. Higtory to saow auw tae jovernúr cuula nave netal imoeaaea in a cone witnout anyunt havinje anumleuse ui it. nllen $\perp$ askea. nim, nut of t..is wounc, if wullets
 Were of the risat material, indicating a ouliet utner than lead onllets misnt
 lea to this opinion.
