

10/17/90

Conversation with Gary Mack about the Ricky White concoctions

Bud Fensterwald due in Dallas 10/16, Gary believes to liquidate the JFK assassination information center there.

Gary has seen a copy of a contract between the center and Alex ~~Kitman~~ Ho, producer, Camelot Productions Corporation, 11255 Olympic Blvd., Los Angeles, CA 90064, for the center to get \$40,000 for acting as technical adviser ~~in~~ on an undefined JFK assassination documentary. The provisions are general and do not make specific reference to the White story.

Someone at the center told Gary they knew all along that there was no such diary as Ricky alleged.

Ho is quoted in a Houston Chronicle story parts of which AP used, not used in Dallas papers, as saying that they soon would all get a laugh out of the White matter.

Gary Shaw is on paper as representative of MATSU. Gary ^{think} think he may be one of the investors in that corporation. It ~~goes~~ goes back to 1/89.

Although the center in its public statements claims to have investigated the White story, they made no investigation at all.

He thinks that the story may have been made up to begin with by Geneva who he says is not very bright. Friends of Roscoe's say his marriage to her was hell on earth. Checking out the story of Roscoe's death he has spoken to people who told him that Roscoe trusted her so little, particularly with money, which he feared she'd spend as soon as she got it, that he asked his employer to make the employer the beneficiary of the insurance policy the employer gave his employees so that the employer could make and send monthly checks of the benefits so that the children would not be in want.

Ricky appears to have had but one year of high school and never was, as he claims, a football hero.

Supposedly People Magazine had the alleged cables to Roscoe checked by an expert. They are mounted in plastic that cannot be removed. The adhesive is of more recent manufacture than the time of Roscoe's death.

Philip Jordan has not filed suit against the center. ~~He~~ He got a lawyer who threatened to file suit if his name is used by it.

Contrary to the reports of the day of Joe West's Geneva press conference, MATSU's suit against West, allegedly an injunction, no papers were then served on West.

All the records they have gotten on such things as where the White's lived were public records all filed within a mile of the center. These prove the falsity of parts of Ricky's story.

The company that insured Roscoe decided to ~~settle the~~ settle the case out of court when it conducted an experiment. It duplicated what Roscoe was known to have done and he admitted before death that he'd done. They put a piece of steel in a vice and welded. A piece of hot steel fell off and onto a can of an inflammable cleaning fluid. The hot steel soon burned through the can and set the solution on fire. Roscoe told several people, including Geneva, when he was dying that his death was his own fault.

Geneva apparently was little more than a prostitute. While still married to Roscoe she was living with another man and was so careless about this that she is listed in a directory, possible the city directory, as living with him. I forgot his name.

Gary says that after initially claiming that "her" diary used by West was written in pencil that she went over with a pen, Geneva finally admitted to making it up.
