

1-3-91

Dear Harold and Lil,

We had a nice time last Sunday and as always the boy can't wait to return to look for frogs and crayfish!

Here is the article by the London Sunday Mail, so much for the world coverage of the White story!

This Laytner is an American writer working for the Mail out of Florida. He spent two days with Harry last August and interviewed Rick during his stay.

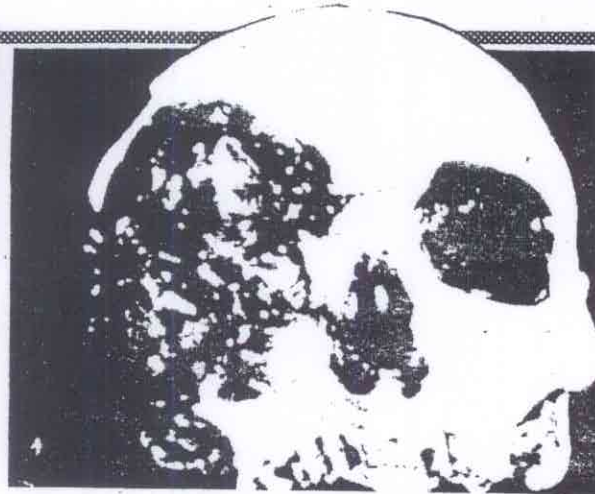

Those FBI report were interesting, early on it does appear that they were highly suspect of something. I am surprised that it may appear that the idea of a commission may have been suggested by the Post.

We will be up again upon our return from Texas.

Take care!

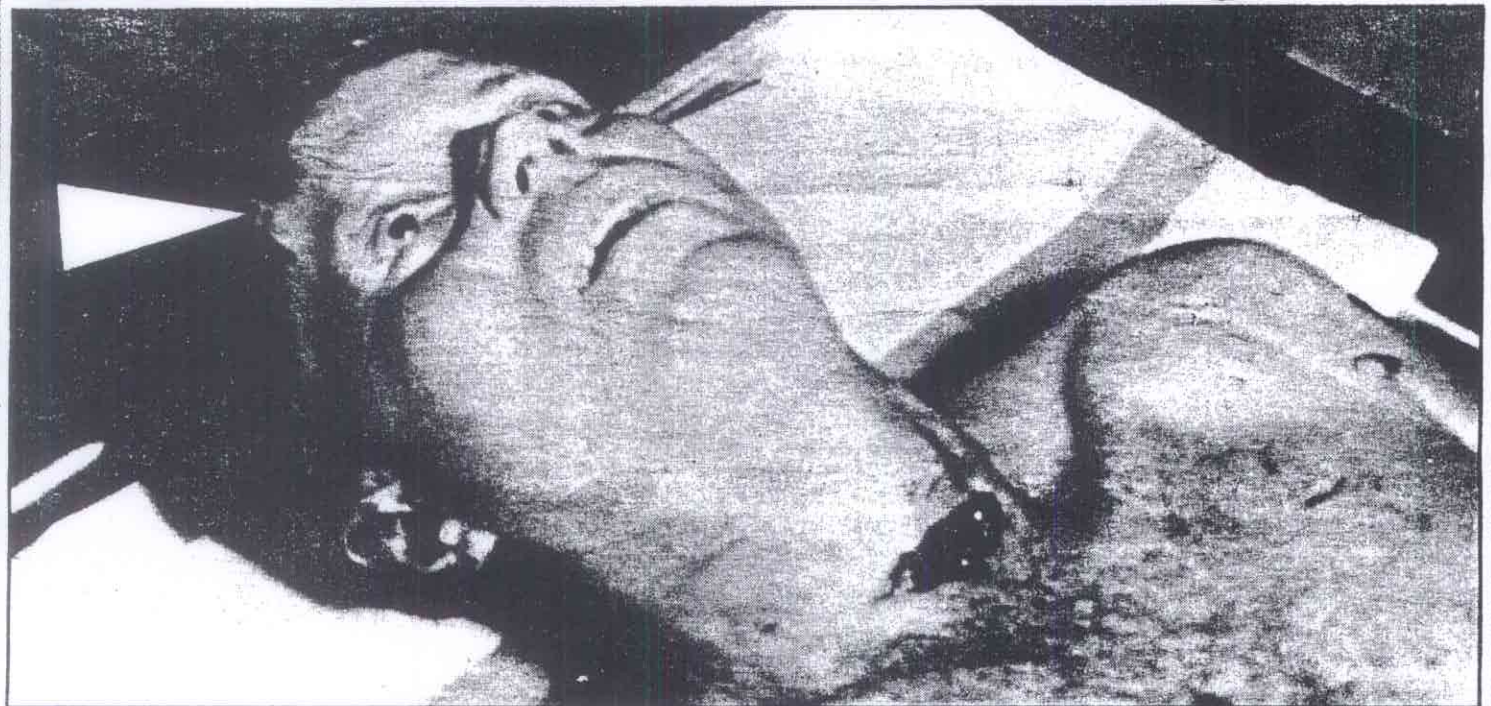

KENNEDY THE TRUTH AT LAST?

THIS X-ray picture on the left clearly shows the front of the skull destroyed as the Warren Commission claimed.

But it does not agree with our photographs below which show the face undamaged with the bullet entry point arrowed on the right temple.

RIDDLE OF THE X-RAYS

ONE of these pictures has to be a lie ...

If the X-ray is that of Kennedy's shattered skull then the dead man in the other picture - published in Britain for the first time - is NOT the President.

But if the X-ray - produced by the Warren Commission - is not Kennedy's skull then the United States government has taken part in a huge deception.

Wound

That is the stunning conclusion of forensic expert Professor Anthony Busuttill, of Edinburgh University.

We showed him the picture - obtained from a secret file - of President Kennedy lying on a mortuary examination table only hours after he died.

By ANGUS MACLEOD and RON LAYTNER

The bullet entry wound can be seen on his temple. His face is totally intact.

The picture was also shown to Professor Busuttill's colleague Dr Gyan Fernando, who had just returned from a month-long trip to San Antonio, Texas.

He had been studying gunshot wounds with the help of the local police homicide team.

At first Professor Busuttill was cautious, saying: "The X-ray picture and the side-on picture of the wound are very difficult to match."

But after consulting Dr Fernando he was in no doubt.

"The X-ray simply does not fit the other picture.

"ONE OF THEM IS NOT KENNEDY."

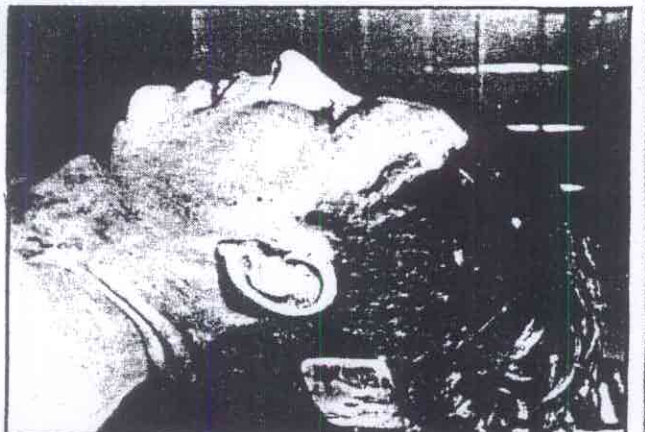

He added: "In the X-ray picture there is quite a bit of bone missing around the eye, nose and cheek.

"But in the side-on picture there is no match.

"If someone had his face smashed in the fashion of the X-ray, it is highly likely the same contours would be in the actual photograph of the victim's head.

"In the shot showing the President with the throat wound on the mortuary slab there is no damage to the face exterior.

"There is no sign of bleeding

Damage to the rear of the skull is evident where the bullet exited

dered but he left evidence."

Lee Harvey Oswald worked at the Texas Book Depository building from which he allegedly shot Kennedy.

But before that, recalled Geneva White, he had been employed at a high-security Texas military map-making company in Dallas.

PLANNING

Her husband was having an affair with a girl working there. Her name was Sue.

"I was working at Jack Ruby's Carousel Club," she told me.

shot Oswald
ital moment in the Dallas police HQ
Oswald was silenced by Ruby.

"One day I overheard Jack Ruby mention her name to Rock in his office and so I sneaked over to the door, which was slightly ajar, and listened.

"She wasn't mentioned again, but what I did hear started me shaking. They were planning to kill President Kennedy!

"They were discussing where Roscoe would be placed and how they would get Oswald away.

"Then the door suddenly swung open and Jack Ruby grabbed my wrist and pulled me in. He asked Rock: 'What are we going to do now?'

"Rock said: 'We can't hurt her. We've got two kids.'

"Jack Ruby said I'd have to see a doctor and have electric shock treatments to erase my memory.

"He told me if I went to anyone or said anything to anybody, then Tony and Rickie would die - he snapped his fingers - 'just like that.'"

The assassination went ahead on November 22, 1963.

"I was watching TV that day with my two boys. When they said a police officer had been killed I was scared to death it was Rock.

"I was worried until he came home that night after seven. He asked me to take his

Riddle of pictures and the X-rays

Continued from Page 23

from the nose and mouth.

"If the Warren picture is authentic then it is not likely that it could have come from the person in the other photograph.

"If the X-ray is Kennedy, then his eye and nose would have been falling off in the other pictures taken in the mortuary."

Both Prof Busuttill and Dr Fernando stress that two major facts have still to be established.

● ARE these picture taken in the mortuary definitely pictures of President Kennedy?

● DID embalmers get to Kennedy's body before the photographs were taken?

Prof Busuttill said: "There is so much riding on this we must prove conclusively that these are pictures of the dead President. There are simple ways of doing this."

Bone

When the Mail asked Prof Busuttill about the throat wound in the pictures, he said: "There is a possibility that a fragment of a bone or the bullet itself may have exited from the front of the neck.

"But you have to remember that surgeons panicked and tried to revive the dying President by a tracheotomy."

The photo evidence is backed up by the testimony of Paul O'Connor, a medical orderly at the President's autopsy.

He said: "The President's face was perfectly undamaged.

"The entire back of the President's head was missing, including the scalp. The X-ray that was shown

was totally that of someone else."

But where then does this leave former Chief Justice Earl Warren.

He wrote in his memoirs "... an attack has been made on the fact that pictures of the badly mutilated head of the President taken for the doctors at the inquest do not appear in the records of the Commission and are now on file in the National Archives.

Secret

"It has been contended that the reason these pictures were not filed was because they would show that the shots which struck the President did not come from behind and above him, but from in front ...

"... I saw the pictures when they came from Bethesda Naval Hospital and they were so horrible (face blown out) I could not sleep well for nights."

Apart from finding Kennedy had been shot from behind, Warren also named Lee Harvey Oswald as the killer.

Our picture would indicate shots from the grassy knoll IN FRONT of the motorcade.

And critics pointed out that if the Warren findings were true then there would have had to have been a magic bullet.

For it would have struck the President and the Texas Governor John Connally, also in the car, inflicting seven in-and-out wounds without damage to itself.

But important evidence has been labelled top secret until 2039.

By that time anyone involved will have died off.

LINKS IN THE DEADLY CHAIN

The Marine...

Roscoe White, a prototype Rambo, during his stint in the US Marines in the Fifties.

Who knew Oswald...

White sent his wife this snapshot, showing his pal Lee Oswald, from the Philippines.

Then married the girl...

Geneva and Roscoe White smile for the camera on their wedding day in Texas.

THE widow of a former Dallas police officer has revealed her husband shot American President John F. Kennedy - on orders, she says, of the US Central Intelligence Agency.

Geneva White, now 60, told me that her husband, Roscoe, planned the assassination with small-time gangster Jack Ruby, the man who shot Lee Harvey Oswald, Kennedy's alleged assassin.

Mrs White, who has cancer and may die soon, claims her husband worked for the CIA and had been ordered to kill the President. He joined the Dallas police force just 17 DAYS before the President's visit.

She said: "My husband admitted to me that he had already killed ten men on orders of the CIA.

"Killing the President was the hardest thing he had ever had to do. But he did his duty. The CIA claimed that President Kennedy was a national security risk."

Mrs White gave me this remarkable testimony at her small home in Midland, Texas, in the presence of her son Rickie, 30.

THREATS

More than two dozen people involved in the Kennedy affair have died in mysterious circumstances - including Oswald, Ruby, Dallas police officer J.D. Tippet and Roscoe White.

For 27 years, Mrs White has been silent because of threats to herself and her two sons.

But now that she might not have long to live, she was ready to talk about ...

● The plot and the CIA connection.

● How her husband killed the Dallas policeman whom they recruited to their evil plan.

DETAILS

● Her husband's agonising death, which she claims was murder.

● His long friendship with Lee Harvey Oswald. (The Mail has evidence they embarked together from San Diego to serve in Japan in August, 1957).

● And his secret diary, which the family allege was stolen by the FBI.

According to the White family, the diary contained a full confession to the assassination.

It gave details that only someone involved in the murder - and placed IN FRONT of the President - could have known about.

Roscoe 'Rock' White also admitted killing Dallas policeman J.D. Tippet, who died from gunshot wounds shortly after the President was slain.

By RON LAYTNER

Geneva said: "I have been sick all of these years because I have been carrying this terrible burden.

"My husband was an American patriot. He worked for the CIA as a hit man. He was authorised to kill and did so, both in the Philippines and in Japan."

Roscoe White died mysteriously in a Dallas explosion in 1971. Geneva White says: "He was mur-

picture to remember the day."

Two days later, Jack Ruby shot and killed Lee Harvey Oswald.

"Rock came rushing into the house, all excited. We had to get out of town in a hurry, he said. We were in danger.

"He told me it was something to do with him having some pictures he wasn't supposed to have."

To protect everybody, said Geneva, she had shock treatments.

FADED

They took effect and Geneva's memory of the Kennedy events faded away for many years.

After the murder, Roscoe White stayed two years with the Dallas Police Department, then resigned.

Geneva said: "He left because he was in danger."

At that time Roscoe stopped contacting his mysterious bosses.

Geneva said: "In the spring of 1971 I won a trip to New Orleans by selling cosmetics.

"But he didn't like the area. I found out years later he'd taken his CIA training there."

Geneva went alone. "The night before I was to receive my sales award a nice-looking man approached and said he had to speak to me alone.

"To prove he knew my husband well, he told me private family things known only to me and Rock.

"He said Rock had 24 hours to get in touch or our little boys would die."

A shaken Geneva returned to Dallas.

"Rock told me he never realised when he joined the CIA what he was getting into. He didn't know that once you were in, you could never get out."

Geneva broke down after New Orleans. "I even slashed my wrists," she said.

Within a few months of ignoring the warnings to report, Roscoe White was dead, caught in a raging fireball when he lit a welding torch and suffered burns over 90 per cent of his body.

"Somebody had sabotaged the welding torch," said Geneva.

"When Rock lay dying he made a confession to our minister, the Rev. Jack Shaw. He named all the people he knew who were involved.

"Rock lived 25 hours. He told us it was no accident and said he had signed his own death warrant by not letting them do anything to me or the boys."

The Rev. Shaw has verified the existence of the diary, but refused to be interviewed.

Geneva White and her son can only recall portions of the diary. They didn't copy it.

"Who would expect it to be stolen by the FBI?" Rickie White asked.

Geneva said: "My husband wrote that he had killed ten people. He also killed Tippet.

"He said they had taken Tippet in as

someone that they needed inside the police department.

"He wrote about 'Saul' and someone called 'Lebanon,' two other people involved, and said poor Tippet didn't have the training and they did not intend for him to live anyway.

"When Rock and Tippet got together with Oswald after the assassination, there was something Rock said that gave him away. Tippet knew then that he wasn't going to live.

"Tippet told Rock that he was going to have to arrest him. That's when Tippet was killed.

"When Oswald saw Rock kill Tippet, he got scared and ran, hollering that he was a patsy."

Rickie White says the diary showed that Tippet wasn't involved in killing Kennedy. "He was only doing a favour for my father - to take him and Oswald to Red Bird Field Airport."

Geneva said: "In April I suffered a cardiac arrest and the doctors told me I could die at any time. I got Rickie to bring the Rev. Shaw.

"He hypnotised me and made me remember all these things.

"I feel like I don't have a lot of time to live so now what I want is the truth to come out.

"I'M NOT AFRAID ANY MORE."
