Harold Weisberg
Hyattstown, Md. 20734
July 20, 1966

WHITWASH: THE REPORT ON THE WARREN REPORT, is now an established success, according to its author-publisher, Harold Weisberg, of ~~Hyattstown~~ Hyattstown, Md., who today announced the third printing will be delivered the week of July 25 and confirmation of the purchase of newspaper serialization rights by the Madrid daily, AERIBA.

The privately-printed exposure of the Report of the Warren Commission, first of the books in the field, according to the author-publisher, has overcome its handicap of a private printing and its form, offset reproduction of the typescript. In a month the second printing of 5,000 has been taken. The third printing is also of 5,000.

WHITWASH is being distributed by A&A, Bookazine, Diamondstein, District News, ^{united} and Raymar. Partners Fran Howell and Roy Woodruff of Raymar informed Weisberg his book is "going like wildfire" on the west coast, and several of the east-coast distributors report it is doing "very well".

Following the refusal of many U.S. publishers to do the book, Weisberg issued a limited edition in mid-1965 while continuing the offer of his book. It was completed in mid-February 1965 and is, according to the author-publisher, still the only work to restrict itself entirely to the official testimony of the Commission and its exhibits and the only really definitive work.

After the book began to sell well in June, additional inquiries were received from abroad and some interest has been expressed by U.S. publishers.

Both Weisberg and his book have attracted considerable radio and TV interest. "I have already spent 10 hours before the microphone", he said, "and five more TV showings and four hours of radio were programmed by July 19". Several programs have also been taped for future use.

Merkle Press, Washington, D.C, is the printer. Weisberg says some of the reviewers have commented favorably on the handicapped print job, singling out the printer for praise, and expressing a liking for even the "feel" of the book.
