

Deposition - Mrs. DORIS MAE NELSON, March 20, 1964, 6 H 143-7

Questioning by Arlen Specter, Asst. Counsel, Warren Commission

Mrs. Nelson is supervisor of the emergency room at Parkland Hospital. She said an empty stretcher that had been in that room was removed when Kennedy was brought in. After Kennedy was put into the casket, his stretcher was removed into the other emergency room, after stripping.

Deposition - CHARLES JACK PRICE, March 25, 1964, 6 H 148-54

Questioning by Specter.

Price is administrator of Parkland Hospital. In the words of Specter's question, Price had all individuals who participated in the care and treatment of President Kennedy and Governor Connally prepare and submit reports which he has kept under lock and key and of which presumably copies have been made available to the Commission. In a discussion of them on p.148, it turns out that ~~Specter~~<sup>Price</sup> had ~~copies~~<sup>records</sup> that ~~Price~~<sup>Specter</sup> did not have and, according to ~~Price~~<sup>Specter</sup>, "at that time you supplemented my records to some extent".

Also on p.148 Specter offered <sup>a</sup> photostatic copy for the record and identified as "Mr. Price's Exhibit No. 2". It is described as a photostatic copy of a letter which was sent by Dr. Kemp Clark to Dr. Burkley, the President's private physician. At the top of p.149, Mr. Specter says, "And with that, the summary of all the treatments performed at Parkland, which was prepared by Dr. Kemp Clark?" This may make some sense out of Exhibit 392 as it appears in the report and as it will be discussed below.

Also on p.149 Mr. Specter refers to "And below that, another summary sheet which bears the corrected notation, with your signature over it, that the President arrived at the emergency room at exactly 12:38 p.m., with 12:43 scratched out?" Price says, "That's correct."

Specter introduces into the record other statements which he marks as

Price exhibits. These are statements made by people who either have already made depositions or who presumably will be called upon to make depositions. I note this because I believe best evidence would be for the people who made the statements to identify them.

On p.150 Mr. Price says that Dr. Charles Gregory had made some penciled corrections in his statement and Price offers to provide a true copy of the corrected version. These alterations are not discussed.

Mr. Price also reveals that on the record of the hospital President Kennedy and Governor Connally were originally misidentified.
