said shots came from behind him. Later he changed his
story. Address: 3909 Marquette, Dallas.

Nearly all of the above-listed witnesses gave testimony tending to corroborate that the shooting came from the Grassy Knoll.

To make a case consistent with the concept of crossfire, one would possibly need to introduce other witnesses who said the shots came from another direction, e.g., the Book Depository.

My suggestion would be to call JOSIAH THOMPSON as a witness. (He is a philosophy professor at Haverford College, Philadelphia, Pa.) He has done an analysis of the testimony the eyewitnesses which strongly indicates shooting was done from at least 2 directions. A book by him is due out this Fall.
