

The Assassination Of John F. Kennedy

Witnesses Queried by the Warren Commission:

Ordered by Date/Time of Testimony

1993 by J.W. Masland

The Assassination of John F. Kennedy
Witnesses Queried by the Warren Commissions
Ordered by Date and Time of Testimony

The purpose of this document is to provide a timeline of individuals who provided information to the Warren Commission.

This project was undertaken to determine the sequence of witness appearances. The record contained in the *Warren Report* and its accompanying 26 volumes of *Hearings and Testimony* do not afford that information. Accordingly, there is no yardstick to determine the manner and flow of information acquired by the Commission during its life. This database corrects this deficiency.

The reader should note the following:

* Not all individuals providing information appeared before the Commission. By the Commission's account, 552 individuals provided information in the following categories:¹

- 94 appeared before the Commission.²
- 395 appeared before and were deposed by a Commission attorney.
- 61 provided sworn affidavits.
- 2 provided statements.

This database contains only individuals appearing before the Commission or its attorneys. Those providing affidavits or statements are not included.

¹ Warren Report, p. xiii.

² The reader should note that not once did all seven Commissioners sit together to hear the testimony of any one witness.

* All times have been converted to Eastern Standard Time for purposes of uniformity across the database. Accordingly, there are a few rare instances of an individual being deposited, for example, in Dallas at 11:30 pm on a specific date, but because of the time shift to Eastern Standard Time the date shifts forward one day. This is not considered significant as the purpose of this project was to provide a sequential listing, insofar as is possible, of the witness database.

* The times were not recorded for all individuals in the printed record. Notably these occurred most often for individuals in New Orleans. Where the time was not recorded a blank space appears where the time would be expected.

* In certain instances, the reader will note that some witnesses share the same time and Commissioner(s)/Attorney(s). In those cases the printed record suggests that the witnesses appeared together and were called sequentially, with the individual times not recorded in the printed record.
