

Dear Dave,

11/25/77

The reverse side is an off-center copy of part of a file I hope you'll be reading about in the Anderson/Whitten column soon.

You talk about your temperature. I hope that was the only problem with getting Jim this weekend and getting him back to the airport. Central Wisconsin and snow predictions was even on the network TV shows.

In your 11/21 you ask about records re King. If you mean the court records no problem. If you want to go for others, two things; I want to use first and I do not yet have all. That is what I'm working on now.

However, if you can see the same approach as you took with 2052, there will be an ample record with some pretty raunchy records including Hoover's initialed approval of not complying with the Act. This goes back to 1969.

Your composer typewrite availability is efficient. The figures represent what I was addressing without the special machine, which should make a much more attractive end product. With a carbon ribbon it should give you camera-ready offset copy.

I'm sure the instructions are with the machine but ordinarily corrections can be made for offset with superimposing the correction. I've even used magic tape, with special precautions. For a large volume there is a special wax and applicator. Of course rubber cement is used by commercial artists.

Here is where you phoned.

Best,

November 21, 1977
Stevens Point, Wi

Dear Harold

Today we got 15 degree wind and spits of snow and I am getting ready to talk to Elizabeth's class of 5th graders on colonial America!

When Jim called me Saturday to confirm his flight into Central Wisconsin and out over this coming weekend I spoke to him briefly about Dreyfus' efforts to get funding. He still works at it. The University System is a hell of a thing, about as rusty and thought resistant as an old tin can, everything is in terms of past decisions, past outlooks, how to cull the future for the security of special privileges. But here the Foundation finally came through with a proposal of seed money to fund a printing project for political assassination documentation. This required an exhaustive number of meetings, memos, public speeches, etc., and continual education of staff secretaries. It is rather unreal but it did move.

They will give 9,000 \$ "dribbled out over 12 months" for one book on JFK and one on MLKjr., 4500 \$ for each book. In addition to not giving it all in one lump sum, but as it is rightfully needed over the process they also wish me to get a bid from a local printing firm to see if they can come close to matching the Banta bid. But I will make the decision on who to go with.

I argued for 2052- as the first(JFK) book, but hope you and Jim will be able to help me come up with the documents and the subject for the second.

We now have a composer typewriter and can make near print copy with justified margins. It reduces the ~~na~~ text ~~by~~ space by 40%. Whereas a typed manuscript of 100 pages would be 100 the composer gives 60 pages to the same material.(Several type faces.)

From the 9M we must pay the typist for the manuscripts. (say 300-400 \$ per book). I figured 350 \$ per book on the basis that one could type about 4 or 5 pages per hour --but this is unknown country, given the machine, accuracy, retyping, etc.

page 2 Of 2

It is important to maintain quality--accuracy above all,
plus format etc.

Today I will send 20 cassettes plus 4 empty boxes. to you
in return for the several items you have or will send me and
assume that this will make us~~e~~ even in terms of costs involved.
If not please say so.

If you need more cassettes let me know.

Yesterday we went to a hippie coop's annual thanksgiving
day dinner--what a different world we all live in! I hope your
holidays contain slightly different food--or as the hippie
leader said to us "You are probably used to food higher up
the food chain".

Take care Lil

Adios

David Wrone
