

Dwar Dave,

6/24/85

Picked up the mail en route to the podiatrist and began reading it while awaiting him, then while awaiting Idl elsewhere, and then holding it in my hands before the air conditioner at home this hot and humid day. So, if you can't read any of it, please send me a xerox ^{of those pages} and I'll type what you can't read. Pretty good.

I've suggested changing retaliation theory to Castro kickback theory, which is the usual and I think more meaningful reference in the literature and talk.

While the title suggests a mystery story, I wonder if the subtitle isn't a better title (as amended), with a subtitle something like Based on the FBI's Records Relating to Wiretapper Arthur James Balletti Which it Withheld from the ~~WARREN~~ Warren Commission.

There are a few minor factual errors. I think I've caught them all, and I've suggested a few editorial changes. Mostly the kinds of things that are in first drafts.

Nothing new here.

good luck iwth it and best wishes to you all,
