

Dear Paul,

7/25/77

Thanks for your note of the 22d and especially for the \$200. "I'll has it and it will be applied to the FOIA costs. In ways for which I do not now have time but in the nature of appeals the costs are about to mount. We are certainly going to have to go this way in the spectro case.

Glad to keep up on the sanctimony surrounding the CBS and ABC JFK commercializations. Nothing new medically except that I remain concerned and not as I was. I see a local doctor in the a.m. and a real specialist a week from today.

The weather has been terrible here but it has not been all that bad on me because of the air conditioning and the restricted amount of walking. I've been doing the walking when it was not too hot or when I could be in the shade, etc. When it was too bad I did it in the house. I've just avoided doing all the running around possible and then when the day had not gotten too bad.

I wish I could remember the little-mentioned New York City incident in which Tesla created quite a furor by some physical consequence of his experiments. You reference to the Canadians having the belief the Russians were doing something along that line with the weather reminds me of this.

The committee has not folded. They are keeping secret. But doing the same crazy things and other things coming from prejudgements, not investigations. They are just staying out of the papers.

With haste, but with many thanks,

INHAND

Dear Harold;

Nice talking to you again after Dallas. I hope you are making progress with your ailment. Have the doctors figured it out yet? I heard on the news this AM that it was 98 today in DC. and 104 in New York. It isn't that bad out here yet but we'll be getting it in Sept. and much humidity also. I read in the paper a while back that the Canadians had discovered unusual microwaves coming down from Russia. They feel that the Ruskies are using some of Tesla old discoveries on weather control and that might account for the extremes. It seems that they are trying to warm up their agricultural parts and by changing the jet stream they can shift the hot and cold. I really hope that you are getting rested and stronger; also same for Lil.

There isn't anything in the papers out here about the House committee on assassinations. Is anything happening with them or did they fold up after they got the money to continue?

Am enclosing a check for \$200. for whatever.

Best,
