

Dear Paul,

Th 7/15/77

The story in this morning's Post adds little to what I heard on the radio last night and mentioned to my friend, unknown to you, Mike.

The story confirms pre-emptive purposes.

This is still another reminder that the supposedly commercial-minded people of the various media, including yours, are not really good at their business when it comes to being intellectually capable of coporindating with events.

If you ~~have~~ had been able to attract any interest in The Defenest ation of Henry Cott it could have been ready to get the world's best natural promotion from this new development. It, incidently, has to prestage the possibility of more, more that made be successfully hidden because of this ploy.

After a subject gets hot movies come along with a bad treatment that does not get the natural advantage of genuineness and is often the misbegotten offspring like the current bastard of the whore Schiller, The Trial of Les/ Harvey Oswald.

Anyway, I'm accumulating what records I can if there ever is any interest and if not or if there is also they'll go to the university archive. The last addition was over 2,000 pages and they really excited Mike.

If the typing is worse than usual the sun is in my eyes.

Mike and I have a relationship of trust. He calls despite having sent me the bug removed from his phone. Room bug. We have never met face to face. I do not know why he got in touch with me. I know it was after he got nowhere with others and I believe it was because from the experiences he had with the drug program years ago he believed that Oswald might have been subjected to some such treatment.

It has come to the point where I expect and am not discouraged by these things cropping up. There is nobody with news background, more a feature or news and magazine background, who can't anticipate the natural human-interest developments in any field in which he is expect. Not all. Not always correctly. But a fair percentage.

As I've told Jim or Howard recently, my forecast, even since first ill, have been so accurate it is like Merlin, the man who remembers the future. The reason is that all is so obvious. It remains unseen by those who wear blinders on the mind.

Hastily,
