Dear Harold,

Sept 9, 1968

Do not despair. The recordings should be all transcribed soon now -

Per your suggestion, I purchased a lovely Sony cassette which I like very much.

Part of Bamster's papers went to Ly Country National Bank of Commerce Bldg, New Orleans. Group Research was somewhat helpful but had less than I anticipated. Next time you are down I'll lend you the material all of which (unfortunately) is on Thermefax & somewhat hard to read.

I am trying to contact Dick Billings now that he has left Lige.

No address on Harber except Omaha - Harber's fear related to Johnny Abbes who, he said, had returned to the U.S. Harber was also in boat when Ed Collins "drowned."

Brunn said that DIA flipped when he was reassigned to active duty & he is

going in a military capacity to Viet Nam
but in a non-intelligence slot. I have no
idea why he came to see me or how much
truth he was telling.

Guess that's it for now -

Best, as always,

Bud
