Recently you replied to my sending you a Dell June booklist not containing references to the Whitewash books by requesting me to send you anything else however inconsequential relating to Dell's handling of the Whitewashes. So I am attaching the letter I had to send to Dell when they mistakenly(?) sent me a copy of Whitewash when I had requested Whitewash two.

Gary Schoener may already have provided you with a copy of the letter but here is another duplicate for your use if he did not.

How does it feel to be screwed by Dell? (sounds like a dry hump)
