Deer Mershall,

We are glad to hear from you, and especially glad to get the picture and to hear you are coming soon. We're looking forward to seeing you egain.

I have lost contact with AID so I don't know wheth r or not there is any hiring. Herman is recovering from an attack of Bell's palsy which hit min suddenly and which is ennoying but in his case, fortunstely not peinful. It paralyzes some of the facial muscles and distorts the face. We haven't seen him for a weak, but when last we did see him, he was ocning slong nicely. You know Herman, he didn t stop working. He has sold the "hein and his place on M St. He is not/et his DuPont Sircle restaurant. If you want to write him, I suprose Linde's Cafeteris, Du Pont Circle Bldg. will reach him. I do not know the exact address on Comn. Ave.

We are about the same. I have been writing, in which Lil has been more than inveluable. She keeps busy typing my notes and things like that when she isn't working mi on a draft, etc. This is another reason I'm glad you are coming here. I made notes on some of the fascinating things you told me but they do not do justice to the language you used, so I want; to sit you down in front of a tape and have you retell the stories, especially about the trip to your school with the waterfowl stops on overloaded load, the story of the snake, an that 1/s the Lebauese. Also, your first visit to a native vill ge, where the chief sent a young women for a chicken! In one of the bo ks I'm working on, I went to include the entire story of the "Geese For Peace". Think about any other that might be interesting that I may have forgotten.

You never enswered the letter about the sketches. If you still have that (was it Congolese) art, we know a man who said he could handle all of it, if it was ell like the semales we shawed him.

I'm really glad to get those pictures, though I regret the loss of the other in the State Dapt. mail. Too biad these are not suitable for reproduction, they we cherish them as souvenirs.

Herman's daughter has her dester's degree except, I believe, for completing her thesis. She has grown into a fine you woman, for which Herman can at least share in the credit. For a man to rsise a winnow motherless dueghter while working as he worked, lavishing every fine thing he could on her without her getting spoiled, is an eloquent tribute to both of them!

If you heven't had any recent word on the ducks and geese lately, how about writing some of the people you left them with for a report? Ask that Lebanese to have a picture taken, with his gesse if he hasn't traded them away or eaten them, and his wife. Do it soon, will you, so you can get a reply by the time you come. I'd be quite interested in knowing if those to whom you gave them did
