Re: N.O.F.O. 97-74 FPCC

In comparing Mr. Hoch's worksheets with the file we have here it is interesting to note the following:

1. PLH's file begins with ser. 1, HW's with ser. 65, into section 3 of this file.
2. Several serials were listed and described for PLH although not given him because they were outside the scope of his request. However HW 's worksheets do not even include these numbers, apparently deemed outside his scope as well! They are ser. 1-64, 69,70,77,86,87,89,90A,91,93,94,95,98,99,100,101,102,103,107,108, 1A1,1A2,1A3, and 1A6
3. In comparing copies of PLH with HW's all seem to be identical.
4. In reference to ser. 74:
Excisions are made in both copies, however in HW's worksheet no exemptions are claimed. In PLH's worksheets, b2,b7d are cited.
