

Dear Harry,

12/12/91

Hasty response to your 12/10, having lost yesterday with a trip to Hopkins and having, among other things, heavy mail to address, yours first.

On the back of the envelope you asked "Did you call Groden?" No, and I won't. I've not heard from his local paper, either. I presume it was in touch with him. He also has not phoned me.

You refer to Xrays of the skull and to a broken bone. I hope not there!

You have a free-standing sentence that makes no sense. It reads: "The pages on Groden I wrote." I do not know what this means. Unless you had something in particular in mind, forget this.

"Do you think Lane fabricated things?" Almost his entire very bad book. Do you need more than his claim to have published the first book on the WC and to have brought to light all that came out under FOIA?

You ask if I can help you with a new chapter on Garrison, Stone and the Shaw trial that your publisher wants. I can but I can't take much time for it. I did not spend any time on Shaw when I was in N.O. but I have on Stone and the movie and I know what did and did not happen at the Shaw trial and that when before they started impanelling the jury I learned with some shgok what their alleged case was I predicted they would lose and deserved to. I had months earlier agreed to be their "Dealey Plaza expert" and the Times actually said I was sitting at the counsel table but in fact I was never in the courtroom and never laid eyes on Shaw/c

If it suits you I suggest that you decide what you want to do and say and prepare the questions you want to ask me or to indicate the explanations you'd like and then at a time when I'm not tied up phone and be prepared to tape it because so much of it is new to you.

The Hopkins neurologist yesterday ordered continuation of the physical therapy. This means that three days a week I have both blood tests and this therapy and that is a big hunk of those days. In addition, there is TV interest in Stone. CBS interviewed me and is to air that tomorrow's evening news. Nightline is to come up and there may be others as the story burgeons. So please prepare yourself as carefully as you can so you can get most of it and that it takes less time when I have so little now.

I presume ~~he~~ Crouch sent you the Delaware County paper. If so please thank him for me when you are in touch and give him my best wishes.

If you want to use the interview as an inter iew, OK with me. I can give you much on the Garrison/Stone deal and on what I told Stone about Garrison some time before he started shooting film. Some of it is hilarious, some gruesome and ridiculous and I think will make good copy and is perhaps better because I warned Stone in advance. Best,

*Adrian*
