

HW: Sorry, the chances of finding any relatively obscure reference like this are minimal unless we have some approximate date to hunt around. Files are simple chronological accumulations from the beginning of WG. Never had time to index properly or make the name card files we should have.

I think you asked earlier for something about Mullen-Bennett and that the answer had to be the same. Such details always are down near the bottom of a story, meaning each potential story has to be scanned thoroughly to avoid missing it. If you can give us a clue as to date we'll be glad to try again.
