

UBAN EXILES PLOT

The plot allegedly calls for a prior series of "Puerto Rico-linked" bombings culminating in a final, fatal blast that will take out Carter and be traced back to "Puerto Rican Nationalists" by cooperative authorities once he's out of the way. The plot is said to be masterminded

by Dr. Orlando Bosch, the mild-mannered pediatrician turned terrorist who engineered the explosion aboard

the Cuban airliner which killed seven-ty eight people last year.

Bosch has been linked by recently declassified documents to the JFK

assassination.

These symbolic Miami-area bomb-ings were followed by vicious attacks on civilians at a safer distance from the Exile's base in "Little Havana" most notably the LaGuardia blast which took 26 lives.

Then their very success in blowing that Cuban airliner out of the sky landed Bosch and most of his key people in jail. Bosch, however, could not be extradited from his Venezualan jail cell by either U.S. or Cuban authorities because of his "friends" in the Venezualan secret police.

When the State Dept. admitted they

were trading information on the ac-tivities of Cuban Exiles with the Castro Government, Bosch's group read the riot act to any and all Cubans who work with the Carter Administration. Either quit or face maining and death at the hands of experienced bombers and assassins.

To prove they meant it, they not long ago exploded bombs on the Ellipse (the grassy knoll south of the White House), and in a downtown building 5 blocks north of the White House).

way with it.
Independent Investigator A.J. Meberman recently uncovered proof-that Orlando Bosch was questioned in connection with the Kennedy assassination when he was in Chicago

in November of 1963.

At the National Archives, an index card reading BOSCH, DR. ORLANNo. 1266 CO-2-34030 DO No.1266 CO-2-34030 SEE CO-2-34104 has just been declassified. The references prefixed CO indicate Secret Service files on Bosch. "No. 1266" is one of a sequence of "control numbers" that

According to Warren Commission counsel W. David Slowson's handwritten notes, No. 1266 was a Secret Service Report about how they quashed the "Mosley-Echevarria Incident".

Secret Service Kennedy Assassina-tion report No.1266 is not in the Na-tional Archives. Slawson himself had to go to Secret Service H.Q. to see it. There's a good chance the Secret Ser-vice has destroyed it. But the index card remains, proof that ORLANDO

BOSCH was prominently mentioned in S.S. No 1266 as one of those "friends" of Echevarria. Meanwhile, adding another clue to Bosch's role, THE NEW YORK DAILY NEWS just broke the story of Cattro's expusitess: Castro's ex-mistress, recruited by Frank Sturgis to kill him. She told

nections.

The FBI, for instance, whose agents just demonstrated on the steps of a U.S. Courthouse against one indictment of Bureau personnel by the Carter Administration, has for years camouflaged the fact that Miami has more bombings than the whole rest of the country combined.

The FBI rushed out the conclusion that the LaGuardia blast was the work of "leftists" (Clarence Kelly, citing "lack of motive" blamed the FALN), despite the fact that the M.O.—putting

Carter is reacting to all this by desparately trying to purge the "cowboys" from the CIA Plans Directorate. The crowning revelation by the N.Y.TIMES of complete gangster infiltration of the FBI—26 of its top mafia informants have been terminated by the Mob's own "22 Caliber Killer"—is a sure sign the public and Congress are being mobilized again, this time because there's no way of telling how far the chains of complicity in Bosch's new Presidential snuff plot may stretch into the Government's "own" police agencies.
