

DEAR FRANK,

12/2/91

Thanks for your letter. Herewith the books. But I am constrained to caution you once again ~~is~~ about making unsupported and unsupportable conclusory statements, like "Oswald worked for the CIA." In the absence of proof, and you have none, this is propaganda, not information. and it is a bad habit for any lawyer to get into.

You might as a lawyer get away with it - and you might get clobbered for it.

Carl Weis has not been investigating the assassination. Rather is it obvious that he has been toying various conspiracy theories and decided which one he preferred. There is no real factual ~~xxx~~ support for the theory that the mafia or Hughers did the job.

The Oliver Stone movie is a stinker and his promotions have already deceived and misled many people. The script, which I exposed months ago, is based on Garrison's drekky rewriting of his own fiasco and history, a book of gross and non-accidental dishonesty. The script also draws on another bad book, "Harris' "Crossfire," a compendium of all the nutty theories.

Weis is a wild man and espousing as you did what he said is irresponsible. What evidence is there - even a suspicion to believe - that the wreck of the Army plane in Newfoundland or the crash in which Hunt's wife was killed near Midway have anything at all to do with any kind of coverup?

This is really sick and it is no credit to your judgment that you have anything at all to do with it.

The memo JFK did sign was not a "secret memo." It was a NSAM, a National Security Action Memorandum. It has been made public.

If you see any articles on the coming Stone movie I'd appreciate copies.

Best wishes,

Other side accidental extra copy I thought might be of interest.
