 Iemarre hod efven teacomb. Great: I hope he regards this as moro tion is
 - bal to him, I'd lice very much to hove e copy to otudy and to gave tochnicet people go over the zeperta of . Iso, it ae hasn't shready tiono so, the should heve slifes made im edietoly, and of the ares before bind after -313, eloce atray ahould be wade. Tareful exsmination of the zlidea yill shoa thet the glit talk by the uninformed seeniag asanation anther thar fact is quit wrong about the bockward motion beine sfralteneously to the back and left. "tay are ciacontinuous, tith the body acturily pivoting. Some of the experte I wht to conault about the rounds, shich exe felriy vialble in stillis, bid seen unteturn to me. Whare is no blood, for exmple, on the beck ot the neck, none on the collar, whoh i seam to recsll is ulaible fohirtio If he ton nd alll to this, I want to be able to go over ting with mecht and Nichola as soon as posaible, there is o tentotive dote nith wecht in N. . . $1 / 17$.
laso, of couree, the latar frames show nort of the knoll. Forhpps in some wey the oorlier franes moy be the most aiknificent, for f have the iomotasion evidence of s shot ma onrly as l63: Their experta initielly eaid he hed to have been abot before 210. I heve this in sote detejl in osi hommb. Then one oi the experts refueed to be bumbozled, they just dian't call him as g mitnoss. I'd like very wheh to be sble to go over thie tuf: with him.

Inlso nope that nith slides ond, if poasible, tramsperencies in addation (used on en opfset.-teble to mate overlays elso) Ring will continue能 o fon brilliont worte at 237. I am confacent i cen have sevarel people do every good job of tracinge, artists, thotiso Frodit milinge of eit pild,

If you exrmine the 2 footage, i esrly learnec one of the bect mys of sesing ratat is there (for ate, at lasat) is in reverse. lits seme to copture
 not to erop. Tha propoitiono whll give more freme then is normal in 35. If the oomynce 19 done with the botton of the 16 frame at the botom of the 25 frama thene moy be, there is coptine the grm, a littie excose ch the top of the Bern fremb. 'his is guite afgificont in the the resident is get the botton of ${ }^{\prime \prime}{ }^{\circ}$ a fromea, thus you get s comprison betwon consecutite fremos.

Shbula Ray have don* thot I've be on told, I bopo te mill do aa I site. This gives us on oportuntty we haven"t bed betnre, becuuse, under the wrong influences, Gerrian failed to go furtier then hia heetilne. Sciember is the only oale in the office who really underatandi the 2 íilm. he saci I want over it very esrefully in the archives early last year. Hon i lone to go over ax thia with dichols and aciat and to have my artist moke tracings: .il throe con quelify as axerta. Wichola snd tecit are both. in adittion, Torensic esperts, ond acholy, uaide from hia conefdersble rifle expriencs and bellistics morit,
 alresdy publi bed thair pictures, rithout threet, end I've regulasly alrea them
 Then perfoctiy ahend to it by life. What a novel he vould meke!

Dem in breaking, ons I muat get to other weris. I've bears the mesther forecost, they do not oxpect it to get out of the toens todsy. No does thet sound in Gouthern Celiformse?
