

^E
CE 3146, enclosures--your corres with A and DJ: Perhaps I've forgotten if you have had anything since July, but this is an interesting thing, that Alcindienst says he'll consider replacing missing pages. I think there is no way they can withhold them under the law and I think it would be good for them to try, for that will be helpful in exposing both withholding of evidence bearing on conspiracy and open flaunting of the law. If there is anything since or anything that comes, I'd like to know. I will, with these copies of your letters, start a file I should have long ago, on Evidence, Missing. If you got turned down by the La police. let me know. If it is anything you think JG may have, I'll ask you. If you desire this, pls send two copies, unless you do not want them to have one. I do not write you at the office. And I expect him here this month, if there is anything you want explored. I am satisfied, by the way, that DJ has framed JG. If I am not satisfied by all of JG's answers, I am without doubt about the case. I've read the affidavits, which I have. You can have them anytime if you want. I see no purpose for you, but you decide. You can always get them. They make no reference to the assassination or to his (excuse the expression)"investigation". I should have established such a file long ago instead of trying to remember. You may want to recall my handling of this in the early days in WWII, I think the Epilogue.
