

CDI408:1,30-1. Fascinating in many ways. If I find time today I'll be writing letters I'll enclose. This can be important to Wade and Ivon (personally) and I will ask both in different ways. If there is any way of following this up more, on any of the leaked items, it could be important. I also think this is something that should be important to your own book, and remember the Ford letter I have in PW and my ExSess notes when you get to it. With this I will be starting a separate file under Commission, Leaks, something I should have done long ago. I have some under Investigation, character of. I did have a card referring to the staff-meeting memos. I'd like a copy for Wade, who I'll write before you can send, and one for Ivon, if he wants, as he should in his personal interest. My letter s should make this clear. This will fit perfectly at least in the Robert Chapter of AO. I'll see if Henry makes any investigation.

This covers all copies you sent. Many thanks.

I've come to the point where Lil will soon be calling me for breakfast. As I age and as the weather permits, I take a brisk walk for an hour after breakfast. I find it helps and gives me thinking time. However, I'll try and return to this after I return and before the mail comes.

CD1408:1-3. If you will please send me another copy of this with a note attached, I'll send Henry a copy and solicit his comment. On the facts and on Alexander and the FBI's having his prints. If you have a 3M copier available, the pale page reminds me, you can often do as with I think the first page of CD325, by slight overexposure, can make blacker and more legible. This is a valuable thing in several ways, as I hope to indicate later.
