

MISCELLANEOUS NOTES

The color photograph of President Kennedy on p.41 of the Associated Press book, "The Torch is Passed", shows a space of an inch or possibly more between his collar and his adams apple when he is upright.

With respect to Mrs. Markham's description of Oswald, a subject of some controversy in the report, note that on p.26 the Associated Press, which presumably did not make the tape that is the subject of discussion in the report, also quotes her as describing the killer of Tippit as having bushy hair. She is also quoted as having said he was about 30 and wearing a white "coat".
