F.S. To give you a separate, independent view of what you are into in what is not decent journaliss in propagands for this sick consittee a copy of what I received today from a fine, solid young man just out of law school. Only # 2 in his class because he was also teaching and was ex. ed. of the law review. I have stopped buying all the crap as it appears so I do not have this bad book. I don't know if this is made up, if that woman is crasy or what. But there is more than Howard says, like Regis Kennedy was a "ew Orleans, not a Dalias FBI agent. I'm reasonably certain there was no Super 8 movie film in 1963 as I am that the existing pictures show her to be older than 19 and the camera she held in her hand to be smaller than the Tashica camera of that day. How can you note pulse into the typowriter over this kind of stuff? HW 4/8/77
