

Supplied 6/10/87

1079 - With the subject marked it means nothing. This is the first of 5; ~~First~~ to Fred Uman memo to Dir 1689 anonymous letter saying assassin is on Edwards guest. He is alleged to be "an East German Communist" so one none of the occasions is his name withheld

1747 When Curtis Neely was reported to look like the released assassin sketch and "a counter-agent for the Komin units" his name also is not withheld

2570 The name of the man who made charges against Larry Simpson was withheld but not Simpson or his place of work

2749 The name of the person who sent a named doctor was the full of both VFR & MLL is withheld but not street of the doctor

1146 relates to search for info on "Galt" in Maritime circles. There appears to have been no reason for withholding & none for consultation with IHS on release

44-38861-4509 changed to 26-398415-IX and described as "not within scope" Perhaps not. But no exemption is claimed so I'd like to see it and be certain it is not relevant. "Scope" is not the issue

2) 44-38861-4600 linked through 94-65861-X2 added or  
allowed to remain. It is a letter praising Hoover that  
while written in longhand also appears in a version  
typed on the FBI's 506 form, "Office of Director"  
so many have been provided it seems that the  
only reason for withholding this is that  
someone went to the cost & trouble to retype  
a meaningless but flattering letter on a form  
FBI the letter had in directing distribution. Such  
another meaningless had to make the same  
of other top officials beginning with ~~John~~ Tolson  
& including Board and Posen, who was supposed  
to be running the gen. investigative division.  
The disclosure of the incredible sanity may be  
the reason for original withholding. No other  
is apparent.  
In this case, the name also is withheld
