books that
invite you
OUT

references and take-alongs
to make every time-off
a memorable time OUT

**the pioneer arts that keep you at home
in the wilderness . . .**

- outdoor ways for healthy, fun-full, safe living hand-in-hand with nature—starting with knowing how to use nature's help:
- learning nature's weather forecasting service—watching insects, animals, sky, smoke, colors, clouds, dew, stars, frost
- finding safe drinking water—recognizing danger, purifying, using rain and snow, where to look
- shopping for fruit in the wilderness—kinds of berries and edible fruits
- being your own greengrocer and getting the best from wild roots and tubers
- using the bounty of nature to make shelters with what's at hand—caves, evergreen bivouacs, lean-tos, huts, dome shelters, Indian camp, mattresses

LIVING OFF THE COUNTRY

How to stay alive in the woods . . . a harvest of ways to provide necessities when ready-mades are missing. Unusual palate-leasing foods from nature's pantry, off-beat shelters, catching fish with improvised tackle, creating weapons on-the-spot, conserving clothes and footwear . . . wise ways to subsist by working with nature. Fascinating woodstore. Many line drawings. . . . a most remarkable book" says *Wildlife Crusade*. By Bradford Angier. \$5.00

ON YOUR OWN IN THE WILDERNESS

Col. Townsend Whelen and Bradford Angier map unforgettable vacations in unspoiled regions—tropical America, the Appalachian Trail, the Pacific Crest Trailway. Backpacking for greatest mobility, least expense. The hunter's pack. Outfitting for wilderness camping . . . maps and map making, hunting methods . . . a compendium of fact for exotic vacations. Says the *Atlantic Naturalist*, ". . . a complete outdoor guide." Order No. 1160 \$5.00

HOW TO GO LIVE IN THE WOODS ON \$10 A WEEK

Alaska's open lands and log-cabin life in Canada explored. Steaks and roasts "on the hoof," nutritious foods "on the grow"—finding a permanent wilderness home—and frontier foods with DUNCAN HINES! The rugged individualist, the weekend camper or simply the adventure-minded will be enriched by this fact-filled picture of a self-sustained world in the heart of the wilderness. Bradford Angier has written ". . . the most amazing do-it-yourself we've ever read!" exclaims *Nich. Game News*. Order No. 845 \$5.00

**Instant woodcraft wisdom for
venturing off the beaten track**

**SKILLS for
TAMING**

**the
WILDS**

by
Bradford Angier

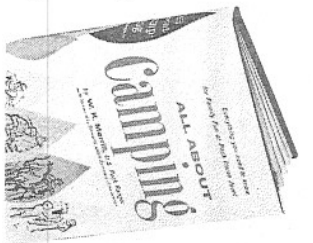

A complete primer on what man knows about getting close to nature—the

- comfort-coaxing low-down on civilizing the rough country . . .**
- how to travel in the woods—energy-saving ways, making time, how to rest, avoiding falls, using torches
 - developing a sense of direction—making compass, telling time, moss growth, stars, landscape clues, picking up and following trails
 - getting the most out of fires—various wood qualities, types of fires, kindling, bark, drafts, stoves, tinder, smoke, without matches
 - using woodsmen's tools—saws, hatchets, axes, knives
 - eating well—what the cook needs, basic grubstakes, easy recipes, methods
 - backpacking—best packs, making, what to pack, what to wear
 - ropes, knots, pack animals, handling canoes, portage, rafts
 - building a home in the woods—best woods, peeling logs, cabin plans, making furniture
 - using and improvising distress signals—fires, smoke, mirrors, stoves, body signals
 - when the wilds bite back—treating bites, wounds, poisons
 - and lots more, easy-to-learn, easy-to-follow, ready-to-teach to others skills that put men, women, young people at ease in unsettled areas—the facts and tips to be naturally at home away from man's clutter. In concise, jammed-with-love pages and hundreds of line drawings.

strategies
tactics
that work

**HAPPIER
FAMILY
CAMPING**

Camping veteran George S. Wells faces the hazards, suggests painless ways to be ready for inevitable rain, cold, pests, ashes in the beans, restless kids. *Library Journal* recommends it "for its originality to state fully and frankly the problems that confront the camper and how best to deal with them."

\$2.95

Order No. 785

Published under the editorial supervision of WILDLIFE MANAGEMENT INSTITUTE, prime, authoritative, basic references for the study of wildlife on the North American continent—for the historian, educator, conservationist, photographer, naturalist, sportsman.

DEER OF NORTH AMERICA

Walter P. Taylor. A panel of America's foremost animal scientists presents a detailed word and picture story of habitat, legend, range, characteristics, anatomy and conservation of the WHITE TAIL, BLACK TAIL and MULE deer: at least one of which is found in every State or Province. Captures the unique qualities of this wary, uncanny and beautiful animal. Fully illustrated. Order No. 490 \$12.50

DUCKS, GEESE AND SWANS

Francis H. Kortright's classic reference work on waterfowl in the northern hemisphere. Color plates, line drawings identify species and depict juvenile and moulting phases of our waterfowl. For naturalist, sportsman or conservationist, a well-thumbed reference. *Business Weeks* calls it a "... classic book of waterfowl identification." Order No. 535 \$7.50

BOBCAT OF NORTH AMERICA

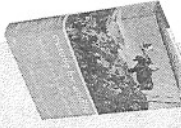

Stanley P. Young. An illustrated monograph on the predatory bobcat covering habits, economic importance, control, taxonomy and behavior. *Journal of Forestry* says "best published information the reviewer has seen..." a guide for practitioners "... reference for students..." Various races of bobcat and their geographic distribution probed. Comprehensive bibliography. Order No. 260 \$7.50

PHEASANTS IN NORTH AMERICA

Edited by Durward L. Allen, this is a detailed study of the pheasant—management, local habitat, needs of species. Color plates, distribution maps, photographs illuminate text. "... must for every serious wildlife biologist..." a modern encyclopedic account," says *Wildlife Review*. Definitive study by 19 specialists. Order No. 1255 \$7.50

CRUSADE FOR WILDLIFE

James B. Trefethen. In a series of dramatic, interlocking vignettes, the history of the conservation movement in the U.S. is recreated. The unrelenting story of how the buffalo, antelope, elk and deer were brought back to abundance, and a look at the colorful men—T. R. Roosevelt, Gifford Pinchot, Charles Sheldon and many others—who accomplished the miracle. Order No. 470 \$7.50

LEARNING about NATURE through GAMES

kids' games, with all the answers for their parents and leaders

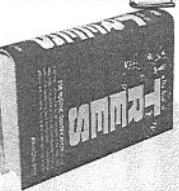

Take these 300 games and activities along for keeping the kids happily busy on trips, at camp, in the park—and in the backyard.

It doesn't take a nature specialist to take advantage of the outdoors with children... to awaken their interests. Through these several hundred activities, games, quizzes, and fun ideas—with all of the information and answers right here!—curiosity is aroused. Shapes, sizes, colors, nature's designs are discovered. All in fun they learn to identify animals, birds, trees, flowers... play their way to knowing and wanting to know more about the living face of nature.

Developed by Virginia W. Musselman and the National Recreation and Park Association.

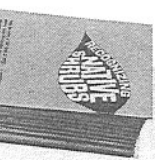

Order No. 941 \$3.95

THE BOOK OF TREES

Botanist, teacher William Carey Grimm provides at-a-glance identification of more than 250 trees from Canada's timber line to the Gulf Coast. Summer and winter keys to each species, instant recognition of trees in the backyard, on a trip, for nature study. Recommended as an outstanding reference book by *LibRARY Journal* and *American Library Assn.* Thoroughly illustrated. Order No. 285 \$7.95

RECOGNIZING NATIVE SHRUBS

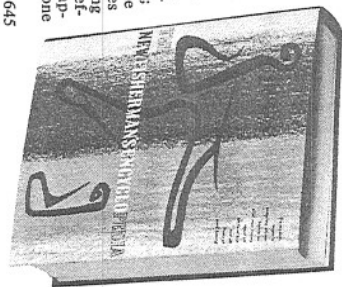

Detailed keys to characteristics of 400 native bushes, woody plants and vines. William Carey Grimm's non-technical handbook for gardeners, campers, and sportsmen who study nature's erosion protectors, cover for wildlife and food for creatures and humans. *LibRARY Journal* states "a good introduction for the beginner who wants to know and appreciate native plants. Recommended for all public library collections." Order No. 1400 \$7.95

Get one each—**The Book of Trees, Recognizing Native Shrubs—only \$12.95**

NEW FISHERMAN'S ENCYCLOPEDIA
Basic reference for school, camp, club and home library

The complete answer library on what man knows about fish and fishing. Game fish—salt water and freshwater species; fishing gear and methods—history, present day tackle, lures; boats—selection, propelling laws, safety, navigation; where to find fresh and salt water fish on the North American continent; techniques, bait lures for specific species; additional equipment, living outdoors. A beautifully illustrated, complete reference on the under-water world and man's approach to it. "You certainly will want at least one circulating copy" says *Library Journal*.
