SHIPPING INSTRUCTIONS

Orders for combat knives and accessories are shipped insured and prepaid anywhere in the world.

The blade of a Gerber Combat Knife is made from special formula alloy tool steel that is in a class by itself for combining great toughness with fine edgeholding ability.

The blade is drop forged for an extra measure of strength and shock-resistance, carefully heat treated to a hardness of Rockwell C58. Both cutting edges are hand-sharpened and honed to a keen shaving-sharp edge. The diamond-shaped cross section of the blade gives another extra margin of strength and offers extreme resistance to breakage. Only a piece of steel of this quality and toughness could create a knife you would want to stake your life on.

The handle is a solid aluminum casting which includes hilt (or guard) and pommel (or end) in one rugged piece. Its design is all functional, not modified by the limitations of other handle types, such as bone, wood, or turned styles. It won't rot or corrode. The grip has Gerber's permanent "Steel-Grip" dull finish—stainless steel sprayed on in molten droplets to give a non-slip surface like a cat's tongue. The hilt and pommel are coated with black, non-reflective, permanent Duracron. The blade has a notched tang and is anchored into the handle with thermosetting epoxy. It will never loosen.

HOW TO BE A GOOD COMMUNIST. Liu Shao-Chi

Here is the book that was more widely read in Communist China than the works of Chairman Mao. For close to thirty years it has been the standard manual on party discipline, the required reading of all party cadre in Red China.

More than 20 million have been printed in 12 languages and distributed in 80 countries and now the first American edition by **PANTHER PUBLICATIONS, Inc.** directly reprinted from the original 1964 English translation by Peking Foreign Languages Press.

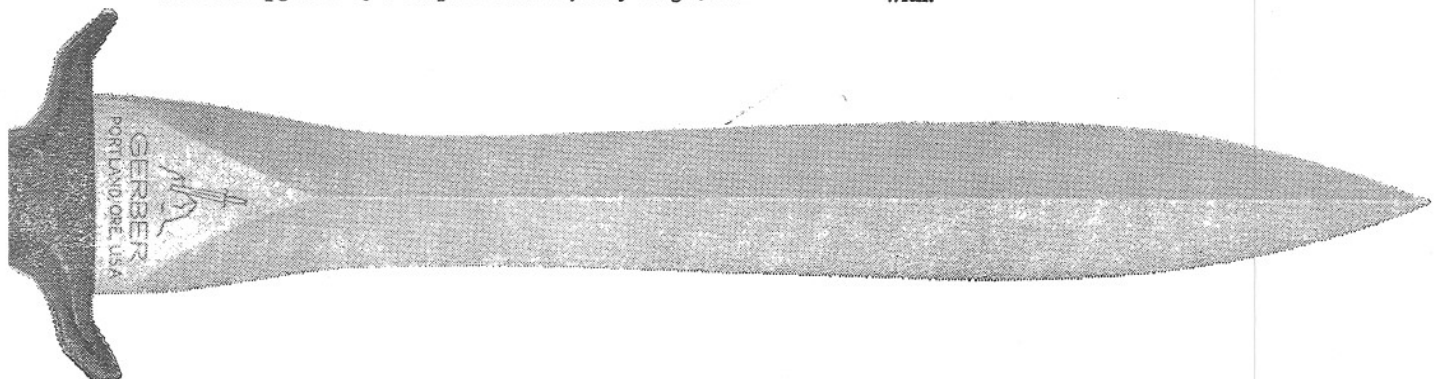

HOW TO BE A GOOD COMMUNIST is the compilation of a series of lectures by Liu Shao-Chi at the Yunan Institute of Marxism-Leninism in 1939. The book represents the thought of the Number 2 man in Red China, a long time supporter of Mao, a hard-line Communist, and an acknowledged master of the theory of mass psychology and organization.

Now the center of a maelstrom of criticism by the Red Guard who call it "a big poisonous weed," it has become the symbol of a man too powerful to destroy by force.

Not since the de-Stalinization of Russia has there been such an intense campaign against so powerful a communist figure, the president of China. To compare what the book says with what is said about the book is an interesting lesson in Communist hypocrisy and double talk.

Necessary to the understanding of the cultural revolution, the book points up the difference between the pure Red Guard Leninist approach to party discipline of continual inner party strife over small details and the pragmatic Chinese approach of rehabilitation of members by criticism.

Regardless of who wins the rough and tumble scramble for power over Red China's 700 million people, the effect of this book on Chinese Communism is one we Americans must deal with.
