

...:Because I think it is not now worth your time I'm not sending Gary Arnold's long and on balance, particularly for the post, quite unfavorable review of the movie All the President's Men of whom only Sloan is included in the cast of characters from which all the Watergaters ^{are} absent. The review is of an overly cool, shallow, superficial, unemotional flick so unsubstantial Barry Sussman is not included but the financial ~~editor~~ editor is. It is a long review. It would take six pages of copying. I think it says the movie is so little I'm not even taking your time to find it to you. However, if you want to read it I can and if you think you'd like a copy I'll make it. Merely return this is you want a copy and I'll know that is what it means. I'll file it with the book. The one merit of the movie, from ~~which~~ which even Katie Graham seems to be missing, too, is that fuck, explicitly and in variation, does not require a rating. For what is becoming a shopping news and with the meaning of WG, the movie seems, really, to justify an obscene rating, which probably guarantees box office success. HW 4.4.76
