Learn that Pres & staff of Post Service

Report visits; management pres. office

"Change of approach - naming of the President;

day at San Clemente & WH "not file, keep David

↳ opening doors and office established by the summer

of 1970; goes between 1st & 2nd day & summer. Also

present in office bldg, same time.

Days 1st day was ~~not~~ 3 or 4 in to it with Presidential

Lyons Bats, about 10 x 10, with about 10 locations

Shining when he was at camp. When he moved, SS.

also called "motion" and stop when he is going. He calls again & lights. He + three Bats had on top, both men of the same age. Bats

More so with 1 qts, Bats on cat for next to. When light was on, the

topping level was trapped then was estimated, included behind arm, not out motion, when it was moving, included by 2 bats on back of on phone on his phone, when Bats Bats full activated.

Pushed up set in back office, not so sharp in helmet room

Part of phone covered for tapping. Upper when, only on his back. But this one was covered when phone was covered except that the

Anticipation by West power & "the party", Nixon covered about Jimmy every thing he probably. John Birchard Holloman & they by others who helped pass, Holloman, they by & Butler field to D.S. & Reed who was <sup>with</sup> Nixon! (He's see. Ben know, but later.) Steve Bull, you

thing. Eke & Don probably "helping" did not know. "Don't know when they see left. Tippo checked at least daily."

his story "to in some lines" Reorganizes her working properly. "Don't know of transactions. Apple is Holloman "because the

Foreign problem is getting to be fantastic.

In checked tapping all I read out's phone calls (unless, it seems

safe to presume, he didn't want to & was phone). The fault in

big as nothing would be missed.

(knows of no occasion on which G.L. didn't want tapping &

had leave working at all times), in checking cabinet room. Attended by later, as all G.L. & not office conversations were taped &

case supported to avoid it.

Asked by S.S. Picked up ~~the~~ story "no two 'bells'"

He mentioned the use of recording device when discovered last Friday, the hearing but reports also's procedure unnecessary. He had not yet ask

with regard of his own testimony. (No Dr. procedure discussed by it) He bringing to other person or person of opening, a laboratory, who were then in prison with them still member too in 1 member notes)

Only opening of which he knows, G. L. must be making arrangements, need in West wing present

Was operated by S.S. / Chief of the Technical Security Division

of the communication: only "XXXXXX" in words "A.D." in two of it

They know how to proceed, so he "guesses" it was done before

3) Buterfield

the mechanism for GL is from the ~~not~~ <sup>presence</sup> of light by means the lower light source to another source (meaning, see) type of light at one time. He could not write,

Hollman "had the authority to see any way in the world."

(This then means GL could always be on ground, could ~~also~~ <sup>be</sup> the leading question, etc.)

When it can be that with no GL present, from B's phone + from location inside cabinet room but having no mechanism being not installed or used. How can it be that?

Conrad saw with My phone)

Hughy called him in mid April to say that the phone was called.

He had explained to me that he had interviewed Hughy + Hollman

+ explained why also the this story

He then - knows better. But why check some facts;

Plan on electronic recording. "write the story"

Sum has 7116 (1) from Ray had to confirm "see assistant" 11971" had been done by "previous case in interview"
