

Dear Ed, your note of 12/28 indicates that you kept files on the Douglas impeachment. I have interest in the Fortas and Douglas impeachments, but insofar as they served (then largely hidden) political interests. Do your files indicate the non-criminal interests in these attempts to impeach and the quid pro quos involved (like Carswell)? Do they reflect how the moves started, who was behind them, which political figures used materials prepared by those who started it? I have two of the offbeat books, one by Hargis' outfit. What did Ford say in his letter when he sent you the report? Anything in the help he had gotten or what started him?

Have not read the clips you sent on Cain. It did not get much attention in the papers I see but the electronic coverage was fairly full.

Thanks for the Ray clip quoting Foreman. I am especially interested in everything Foreman says. He has been involved with some of your local crime figures. There is one case where he seems to have been brought in to put his client away. This is what he did. It has been beyond my capacity to follow this up, but if you have anything bearing on it and his doing that, which is exactly what he did with Ray, I would be interested in having it for his defense. Foreman has done this elsewhere. Interesting? Thanks and best, HW
