

10/9/73

Hal---

Herewith, plus attached clips from my files, is information available to date on two Chicago wiretappers who worked for Hunt on mysterious Phoenix, Arizona, assignment.

They are described as a couple of Jewish boys who had a "half ass" partnership between themselves to make and sell electronics gear for the investigative trade. Bernie Gordon was the electronics wizard, even though the enclosed clips credit Mike Stevens for producing the equipment for Watergate. Source says Stevens is real "mope" and that Gordon is the brain who does the bug and tap work.

At one time they operated ^dAudio~~tronic~~ Laboratories, 4152 North Western Avenue. They also had offices at 1745 West Devon. They changed names and addresses frequently. (Note different addresses cited in clips from those I list.)

Last known address we have for Gordon is 4827 North Sheridan Road, Apartment 706, Chicago, phone (312) 973-6708. We have a source attempting to contact Gordon and learn more from him. I am having a couple other people check them out I too.

However, I really don't have much confidence that anything solid will come of it. Stevens sounds like a con man...and he's supposed to be the stupid ^{one} of the pair.

Let me know if the names mean anything to you...or to Fensterwald on a different basis from that put forth in ~~the~~ Marks' I stories.

Inasmuch as you are in Maryland, if I were you I would be most interested in the ~~and Nixon~~ suicide last May of Rep. Mills. Could that have been a precursive tie-in with Agnew problems? Did you note item in Parade of 10/7 which alleges that Sen. Scott's man in GSA may have had a hand ~~in~~ in dredging up charges against Agnew? You no doubt have noted more and more attention on Hughes-Nixon connections in the press. With a disenchanted Maheu on the loose, who knows what might be revealed.

At ~~in~~ last some voices are beginning to be heard against the invidious Agnew-Kerner "impeach me, don't indict me" argument. I have no doubt that ultimately ~~the~~ the contrary and correct "no man is above the law" doctrine will be reasserted in the courts and, I would hope, extending through the ~~next~~ Presidency. But maybe I hope for too much.

Best,
