

I have no interest in the Marchetti piece, but I'd appreciate the hunt story when you've finished. No hurry at all. The Interprogress and David St. John names are new to me. Odd the timing on it, when there are behind-the-iron-curtain deals making scandals, with Gen Foods a Mullen client (I think for influence only, not straightp.r.) And Interprogress reminds me of Interpenetration, the name of a force of Cuban mercenaries. What Woodward omitted I also found interesting. Indications are the piece was rushed. The same mag. has a long series of excerpts from the trash spy stuff of another Washington writer who also uses the name Bleeck. H 10/8/72
