The discrepancy in the matter of Liddy's alias on his LA trip with Hunt, appearing in the NY Times of 2May73 (WX Star) and SF Chron of 21May (Time) may represent nothing more significant than two different leaks. Time's full account may help to clear it up, but I doubt it. Thought you might like to be alerted to it.

jdW21May73

If the CIA gave Gray details of aliases and false identification papers used by Hunt and Liddy, does giving the name Leonard mean

Liddy used Leonard on some other job in connection with PentPapers in 1971?

Liddy was carrying two sets of papers on flight from California?

CIA included on its list all aliases used by Hunt and Liddy at any time?

By the way, does Time give the date this information was given to Gray?
