Hal---

Semi-brilliant thought: Nother suit filed today by survivors of one of ten kilt in UAL crash near Midway.

Why don't we (me) contact attorneys in one of these suits and suggest that they, in taking of depositions, determine all many and sorts as of factual information from airline about presence of Dorothy Hunt, recovery of her possessions, possibility of electronic devices in her luggage... or cyanide generating equipment in same?

Will take time, of course, but these attorneys, I'm virtually certain, are working on contingency basis (perahps cost plus, also) so they likely would have an interest in probing the bizzare.

What do you think?

Best,
