

Larry, the enclosed note is from a near-Chicago writer friend. He sent the 2/2/73 Sun-Times "Federal Midway ~~crash~~ crash hearings set Feb. 27" story with it. That says the NTSB "reviewed in a seven-page document the facts so far established." Do you have? Is there the chart of the body positions? This relates to the cyanide, which bodies were where if they showed lethal doses? If I don't have any reason to believe someone let the cyanide out, it would be a good question to eliminate, given the official prior FAA position on whether burning plastics had this capability.

On Rife, I got the enclosed letter from Fishman this a.m. I called him after going through my files to get the name of the crook Rife says did the stealing. He was not in and is not ^{ed} expect until about 3 p.m. our time, when I hope he'll call me back. If anything transpires I'll let you know. III 2/5/73
