

Other enclosures: I've had time or taken it to read the ChiToady AP 9/25 saying the committee has reason to believe Hunt was involved in other such bag jobs. Match. That is why they asked him about none and why the staff has turned to such leaks. The only apparent reason the stuff about the DJ cobering-up on Segretti came out is because it was leaked to Dan Schorr when it was clear it was to be avoided, he aired it during a recess to vote, and once it was aired, it would be more embarrassing not to go into it.

Your 9/30:

During the "early spring of 1971" Hunt was not officially a "plumber". This in no sense diminishes my interest in those locals and their job in ~~Phoenix~~ Phoenix. Esp. with the Hughes connection. The committee also suppressed much on this. I hope they'll talk. I don't think it was a CIA job or a direct one. Seems rather elaborate. Does Hughes have Phoenix operations? Are there competitive or anti-Hughes doings there? I don't see an immediate cause or connection. While there is much you can't communicate in a note, the elaborate scripting and all the movie equipment moved in would seem to destroy the alleged cover, that they were there to "watch some Cubans in the area." One watches inconspicuously, not with an army.

Another thing that worries is all the unpunished fraud with credit cards. Those outfits generally do not accept being gypped and I would suppose have the facilities for seeing to it that something is done to those who do it.

PM session hearings about to begin. Many thanks,
