

Howard, when we were looking at Bean reading his prepared statement I called ~~two~~ two things to your attention: he was skipping; and he described as relating to Mrs. Hunt some of the private papers from Howard's safe. Today I got to going over the verbatim excerpts. As I'd suspect, all these references have been edited out. Dots appear to show it. Therefore, is this is in the Times version, I'd appreciate it if you'd send it as soon as you can, if necessary, please, getting from the library. If you do this, restrict to the Hunt parts only. I am finding significant data totally ignored by the media. Thanks. Seems like you got home to a flood. HW 7/1/73

Js, FYI: Post version, p. 9 bottom col. 4, where dots appear, last two full ~~gnafsz~~ graf.s.
