

in the VVAW
Fernandez, whose employment as an agent of the Miami police/was confirmed by them,
was at that very same time working for Barker, and had been part of the "team" the
White House crew sent under Barker to attack Ellsberg and Kunstler and disrupt the
planned and otherwise peaceful peace demonstration on the Capitol steps. (UPI-7/29/73)

Or, it is not only that the White House made the disturbance at the peaceful
Capitol demonstration. It also, through these same agents, undertook to guarantee that
there would be similar disturbances, of its own creating, at ~~the~~ its one convention.

These things - all of them and more- were then fed back as an excuse for the
entire operation that created them. First the disturbances were created, and then it
was alleged to be necessary to take illegal, really subversive, steps to ~~curb them~~
first "learn" about them and then to curb them.

It was a self-feeding political pile, make trouble where there is none and then
use this created trouble as an excuse and justification or making more trouble.

There was no need for the CREEP branch of the White House special dirty-tricks
department. Once it was established, the first thing it did was make the trouble it
then claimed required its existence and justified its acts.
