

UCLA film students protest Attica

Dear Editor:

Thank you for your comprehensive coverage of the Attica events.

The Eyes and Ears News Bureau is a group of UCLA students formed during last spring's campus strike, to attempt to use our media oriented talents to create a consciousness among our society about its critical social problems. We have taken a public position regarding Attica, which we enclose and ask you to publish in the letters column, to in-

dicating our concern and to try to create a spark of concern among others:

* * *

The Eyes and Ears News Bureau, UCLA Motion Picture Division, views with alarm the total disregard of human life exhibited by the authorities of New York State. It is frightening to see that a man like Governor Rockefeller can afford to take the political risk of destroying forty-one lives. What this reveals is a growing numbness to horror by the American public.

The climate of public opinion that absorbs Kent and Jackson State, My-Lai, and now Attica has by its silence given approval to murder as an officially sanctioned political tool.

We as UCLA students realize that until each of us participates in making murder an unacceptable political alternative, future tragedies will occur with our complicity.
