CIA (d)

4 Feb 75

(UPI story from Chicago, on press conference 3 Feb 75 given by Dick Gregory and Robert Groden, described as "a New York photographer and optical specialist." They show Zapruder film. Groden says this proves that Oswald "had nothing to do with the assassination."

(Gregory says he and Groden will leave for Washington 8 Feb to take the film to the Rockefeller commission. Story as carried by SFC gives no explanation for this, but another UPI story says Gregory "said last week he had evidence indicating the [CIA] was involved in the Kennedy assassination."

(Other clippings on Gregory/Groden are also filed Misc - Study Groups.)
